## **INTRODUCTION**

A thorough understanding of citizen attitudes toward growth and development provides a strong foundation upon which to build regional policy for the Centre Region Comprehensive Plan. The Centre Regional Planning Agency (CRPA) conducted this survey in the summer of 2011 in conjunction with an update to the Centre Region Comprehensive Plan. The survey serves as a key public participation component of the Comprehensive Plan Update. Elected officials and staff chose the resident survey as a cost effective method to ask for resident opinions regarding a number of issues in the Centre Region to inform the preparation of the Comprehensive Plan Update. The survey contained 43 questions regarding land use and development, housing, community services and facilities, transportation, the environment, economic development, and government and resident communication.

This report summarizes statistically valid data that accurately reflects the opinions of the respondents regarding various issues facing the Centre Region. The CRPA used a random sample specifically to provide an equal chance of selecting any member of the population for the survey. Residents who received a survey determined for themselves if they would complete the survey or not.

This report is organized in three primary sections, the Executive Summary, Complete Survey Results, and Appendices.

### **Executive Summary**

The Executive Summary includes the major findings of the survey results in a concise format. Major findings capture resident opinions based on broad topical areas (i.e. land use, housing, and transportation). The CRPA has presented responses in this manner to be consistent with the sequence of questions in the survey questionnaire and so that individuals can quickly develop a clear picture of the survey results within each topical area of the survey. The major findings provide a brief narrative summarizing the results and provide a partial list of responses to individual questions to support the conclusions. Individuals may consult the appendices to review the specific responses to all survey questions and to examine results by individual municipality.

The Executive Summary also includes key implications for the Comprehensive Plan Update and a narrative describing the survey process. Key implications expand upon the major findings and identify how resident opinions in each topical area help build the foundation for goals, objectives, and policies in the Comprehensive Plan Update. The key implications are not all inclusive.

### **Complete Survey Results**

The second section of the report provides all survey results, including detailed graphs of results and brief narratives for most questions. This section also includes the write in responses for questions that included "Other (Please specify)" as an option.

## Appendices

The last section of the report contains Appendices, with results in tabular format for the Centre Region and for the individual municipalities. Individual appendices also contain the survey methodology, a demographic profile of survey respondents, comparison to the 1986 survey questions, and a summary of the process used to solicit public participation for the survey.

## EXECUTIVE SUMMARY

The CRPA prepared major findings for regional results in the following areas:

- Land use and development
- Housing
- Community services and facilities
- Transportation
- The environment
- Economic development
- Government and resident communication

### Land Use and Development

These questions were included in the survey to understand if there are potential gaps between resident opinions and specific goals, objectives, and polices related to land use and development as identified in the Comprehensive Plan. Respondents overwhelmingly reaffirmed that existing Comprehensive Plan goals are relevant and should continue to be a part of the Comprehensive Plan Update. Respondents indicated substantial support for maintaining a cooperative relationship with Penn State, preserving prime farmland, directing future growth to areas inside the Regional Growth Boundary/Sewer Service Area (RGB/SSA) and preserving low density community character outside the RGB/SSA.

Respondents identified their highest priority land use issues as preservation of natural resources (air, water, soil, forests, etc.), preservation of farming, and preservation of established neighborhoods. Residents supported use of regulations and local financial resources to preserve natural resources, historic resources, and farming.

Respondents generally appear satisfied with the mix of land uses in the Centre Region. In fact, most respondents did not support the need for additional commercial uses in their neighborhoods.

- About 66 percent of the respondents would like to see a low to moderate increase in population over the next 30 years.
- About 72 percent of the respondents support using the Regional Growth Boundary as a tool to manage growth in the Centre Region.
- Less than 50 percent of the respondents believe the economic needs of the Centre Region should be the driving force that determines what type of development takes place.

- Over 85 percent of the respondents agree or strongly agree that municipalities should use regulations to preserve natural resources.
- About 86 percent of the respondents considered preservation of natural resources (air, water, soil, forests, etc.) the most important land use issue in the Centre Region.

## **Housing**

Survey respondents indicated their support for a variety of housing opportunities to meet the needs of all existing and future residents. In particular, the survey asked residents to rank housing characteristics by order of importance, from the most important to fifth most important. About 69 percent of the residents surveyed identified affordable rental or for-sale housing as one of their top three housing priorities. There was also support among survey respondents for owner-occupied housing, with 61 percent indicating this as one of their top three priorities. The survey results suggest that the Centre Region currently offers an adequate mix of housing types. About 37 percent of respondents indicated that this is one of their top three priorities.

- Nearly 72 percent of those surveyed indicated that an overall housing goal should include a wide variety of housing to satisfy the needs of current and future residents.
- Just over 69 percent of respondents identified the need for affordable rental and for-sale housing as one of their three top priorities.
- When asked how important it is to increase various types of housing, 78 percent of the residents surveyed rated an increase in the amount of single-family detached housing in the Centre Region as one of their top three issues.
- Just 29 percent of the respondents felt there was enough rental housing available in their price range.
- About 44 percent of the respondents felt there were enough single-family homes available in their price range.

## **Community Services and Facilities**

Centre Region residents continue to give high ratings to public services and facilities provided in the region. Survey respondents rated the quality of services provided on a scale of one to five, with one being very dissatisfied and five being very satisfied. Generally, rankings for community services and facilities were well above four, indicating 80 to 90 percent of the respondents were very satisfied or satisfied with services.

- Public safety services had a very high level of satisfaction in the region. Over 90 percent of the respondents were satisfied or very satisfied with police service, fire service and ambulance service in the region. Nearly 80 percent of respondents were satisfied or very satisfied with emergency health care service in the region.
- Public water and sewer services also rated highly, with about 80 percent of the respondents indicating they were satisfied or very satisfied with these services.

- About 85 percent of the respondents were satisfied or very satisfied with the regional recycling program. The survey also asked about composting. Over 40 percent of the respondents selected uncertain/undecided regarding composting programs in the region.

### **Transportation**

The survey asked about several aspects of transportation within the region and surrounding area. The primary purpose of travel on weekdays for 65 percent of respondents is for work, with 21 percent of respondents indicating that their primary travel purpose is for shopping. About 85 percent of the respondents use a private vehicle to for their primary travel purpose during the weekday. Other results include:

- Over 82 percent of the respondents work in the Borough of State College, Ferguson Township or College Township.
- More than 65 percent of respondents indicated the importance of maintaining good pavement quality on roadways, and good bridge conditions
- Over 54 percent of the respondents would like to see more sidewalks and bike lanes along roadways in the region, and 56 percent favored adding more off-street bikeways.
- Nearly 46 percent of respondents would like to see more passenger air service at University Park Airport.
- About 42 percent of respondents would like to see access to high speed rail in the region.

### **The Environment**

Protection of the natural environment was highly valued by respondents to the survey. Not surprisingly, respondents overwhelming support protection of drinking water quality, protection of water resources, and air quality protection throughout the Centre Region. Protection and access to open space such as forests, State Game Lands and natural areas were supported by respondents. Similarly, respondents also strongly support restricting development near Spring Creek and its tributaries to protect that important natural resource.

- Approximately 51 percent of respondents identify “maintaining a low level of environmental pollution” their most important objective to guide future growth and development in the Centre Region.
- Over 75 percent of the respondents agree that municipalities should use regulation and local tax resources to preserve natural resources.
- More than 70 percent of respondents rank protection of groundwater and surface water resources as the highest priority natural and environmental issue.

### **Economic Development**

There were several economic development-related questions on the survey. Respondents strongly favored retaining existing businesses over attracting new businesses or expanding existing businesses.

Assuring that infrastructure is built and maintained to serve existing businesses was important to respondents. Likewise, respondents support “buy local” programs, particularly in the agricultural sector. Respondents would also like to see job creation in the high tech area and they support natural and cultural resource-based tourism programs for hiking, biking, birding and the arts.

- Almost 57 percent of respondents indicated their highest economic priority was to retain existing businesses in the Centre Region.
- Just over 40 percent of respondents indicated that municipalities should use incentives such as infrastructure improvements and providing tax abatements or reductions to keep businesses or attract new businesses.

### **Government and Resident Communication**

The survey asked respondents to select the three ways they would prefer to receive information regarding community meetings, issues or events. Most respondents prefer to receive information via a municipal newsletter or in the newspaper.

- Over 50 percent of respondents prefer to receive information via municipal newsletters or the Centre Daily Times.
- More than 30 percent of respondents prefer to receive information via inserts in utility bills or refuse bills by mail, via e-mail or by reading municipal or COG webpages on their own.
- About 12 percent of respondents would like to receive information via social media like Facebook, Twitter or blogs.

### **KEY IMPLICATIONS FOR THE COMPREHENSIVE PLAN UPDATE**

What do the survey results mean for the Comprehensive Plan Update?

- Continue a balanced approach to growth and development in the region.

Respondents strongly favored a balanced approach to growth and development in the region. The CRPA defines a balanced approach as an inclusive process that engages diverse opinions. A balanced approach also allows an impartial evaluation to reach consensus on competing interests and goals. The current decision-making structure in the region reinforces a balanced approach and will continue in the goals and policies of the Comprehensive Plan Update.

- Improve and reinforce non-vehicular access to open spaces and recreational areas

The geographic proximity and physical connections between residential areas, parks, open spaces and natural areas have value for residents in the region. This conclusion reinforces several long-standing land use, transportation and infrastructure practices and decisions in the region, and indicates the importance of planning for growth and development as a system and not a series of inter-dependent actions. Goals and policies in the Comprehensive Plan should strengthen the non-

vehicular connections from existing residential areas to existing parks, new parks, recreational areas and the natural areas that are part of the region.

▪ Respondents want long-term policies that protect how the region looks today

Respondents indicated very strong support for policies that contain growth inside the regional growth boundary, preserve prime farmland for agricultural uses, plan for efficient use of infrastructure, and protect natural, cultural and historic resources in the region. Respondents also indicated they felt there was too much retail development in the region and were not supportive of adding to the inventory of retail businesses in the region. Likewise, there was mediocre support for economic development activities to provide incentives to new or existing businesses in the region. Comprehensive Plan goals and policies should continue to implement the regional growth boundary/sewer service area and protect rural resources, particularly farming.

▪ Residents are highly satisfied with public services and facilities in the region

Respondents overwhelmingly indicated they were satisfied or very satisfied with the quality of public services and facilities in the region. This indicates that public services and facilities are well run and effectively meet the needs of the region. Comprehensive Plan goals and policies should continue to support efficient use of these resources as the region continues to grow and as individual providers such as water authorities and the UAJA deal with changes in the federal and state regulatory environment. The implementation of the regional growth boundary/sewer service areas may also contribute to efficiency in the infrastructure system.

▪ Local solutions to transportation and traffic issues are important

The survey responses indicated that residents rely on private vehicles for their primary trips on typical weekdays, work and shopping. Reliance on private vehicles is anticipated to continue in the future. Residents' preferred roadway improvements focus on maintaining the existing system and making other small-scale improvements. Given fiscal constraints and the desire to minimize impacts to the community, officials should focus on maintaining good quality roadway pavement and bridges, adding travel and turning lanes to existing roads, and upgrading traffic signals.

The Comprehensive Plan's goals, objectives and policies for land use and transportation should focus on maximizing use of the existing roadway system. The Comprehensive Plan will form the foundation for using municipal capital improvement programs and the Centre County Metropolitan Planning Organization's Long Range Transportation Plan (LRTP) and short-range Transportation Improvement Program (TIP) to make investments in roadways.

Although only a small percentage of residents currently use public transit, as the population ages, fuel costs increase, and the desire to limit impacts to environmental and community features grows, public transit's mode share is anticipated to increase. Local officials can use land use policy and fiscal commitments to facilitate demand for public transit, and to provide capacity to accommodate

increased demand. Residents indicated which strategies should be implemented to increase use of public transit, which will guide detailed plans to upgrade public transit infrastructure and expand service.

Residents gave strong support for constructing more sidewalks and bikepaths, and making connections between existing pedestrian and bicycle facilities. Goals, objectives, and policies in the Comprehensive Plan will reflect the high priority given to making improvements to the pedestrian and bicycle system, using tools such as the municipal Official Map, CIPs, and the CCMPO's Transportation Enhancements Program.

The desire to have a wide range of travel mode choices available to residents was also reflected in the priority given to increasing passenger air service at University Park Airport, and to providing access to high speed passenger rail service.

Overall, the survey results indicate that local solutions to transportation and traffic issues are important, including maintaining and improving the existing transportation system, and broadening the modes of travel available to residents.

- Single-family housing that is affordable to residents is important

As an overall goal, the survey results indicate strong support for a wide variety of housing options to satisfy the needs of existing and future residents. There was strong support for increasing the supply of single family housing. A majority of respondents identified housing within walking distance of work, shopping and transit service as a high priority. Residents appear to be satisfied that there is an adequate supply of apartments and mobile homes in the Centre Region. Over two thirds of the respondents indicated that affordable rental and for-sale housing is a high priority. A third of respondents feel there is a need for more affordable rental housing in the Centre Region, yet respondents are fairly evenly divided regarding the availability of affordable for-sale housing.

The Comprehensive Plan's goals and objectives for housing should focus on the efficient use of land and energy in future housing developments to broaden the availability and affordability of housing in the Centre Region. National trends toward smaller homes on smaller lots within walking distance to daily services and transit should be considered where appropriate to meet demands for affordable single-family housing. Though the survey did not point to a deficiency in affordable rental housing in the Centre Region, further study may be warranted as part of the on-going Comprehensive Planning process to determine whether this is a complete picture.

## **SURVEY BACKGROUND**

### **Conducting the Survey**

Development of the survey questionnaire started in May 2011 using a previous survey from 1986 as a starting point for some questions. The CRPA also contracted with IntelliQ Research and Strategy of State College with assist with developing the survey instrument. Other agencies participating in questionnaire

development were the Borough of State College Planning Department and Ferguson Township Planning Department. The COG Transportation and Land Use Committee and the Centre Regional Planning Commission (CRPC) provided oversight for the survey. The TLU Committee and the CRPC approved the final survey questions at a joint meeting in June of 2011.

All addresses in the Centre Region were eligible to participate in the survey. From the universe of approximately 39,000 addresses, a random sample of 2,000 received the survey. Potential recipients first learned about the survey through a flyer in the Centre Daily Times previewing the survey about two weeks prior to mailing. The CRPA then sent pre-notification post cards to the 2,000 randomly selected addresses about one week prior to mailing surveys. Each address then received a survey with a cover letter explaining how to complete the paper survey or an online version of the survey. The recipients could return the paper survey to IntelliQ by mailing the survey back in a pre-paid envelope. Recipients could also complete the survey online using a unique code mailed with the survey. The CRPA mailed two reminder mailings to all 2,000 randomly selected addresses.

Members of both the COG TLU Committee and the CRPC felt that all residents of the region should have the opportunity to participate in the survey. The CRPA offered a “drop-in” survey on the CRPA webpage that was open to anyone who would like to participate. This option was advertised on the webpage in municipal and COG meetings. Results from the “drop-in” survey generally were fairly consistent with the results of the random sample at the regional level. The CRPA reported the results of the drop-in survey separately to maintain the validity of the random sample. This report however, does provide the results from the random sample, the drop-in sample and a combination of both the samples.

### **Respondents**

Approximately 23 percent of the recipients in the region, or 461 people responded to the random sample survey. Another 150 people completed the “drop-in survey. Appendix “G” provides characteristics of respondents to the random sample survey.

## **COMPLETE SURVEY RESULTS**

The report focuses on the survey results at the regional level. This report contains results for the random sample survey contained in Appendix “A”. The random sample in Appendix “A” also includes the results by individual municipality. The report does not evaluate the results for individual municipalities. The results for the drop-in sample, the combined random sample/drop-in sample and the weighted sample are included in separate appendices.

### “Uncertain/Undecided” Responses and Rounding

Several questions in the survey allowed respondents to answer “uncertain/undecided.” The full set of responses in the individual appendices show the proportion of respondents selecting the “uncertain/undecided” reply. The analysis presented in the body of the report does not include “uncertain/undecided” responses in most instances. In other words, the tables and graphs in the body of the report show only responses from respondents who had an opinion about the question or item unless there were a substantial number of respondents who selected “uncertain/undecided.”

Respondents could also select multiple responses for some questions. In this type of question, the total may exceed 100 percent in tables where this occurs. When a table, graph or chart for a question that only permitted a single response does not total to exactly 100 percent, it is due to the customary practice of rounding percentages to the nearest whole number.

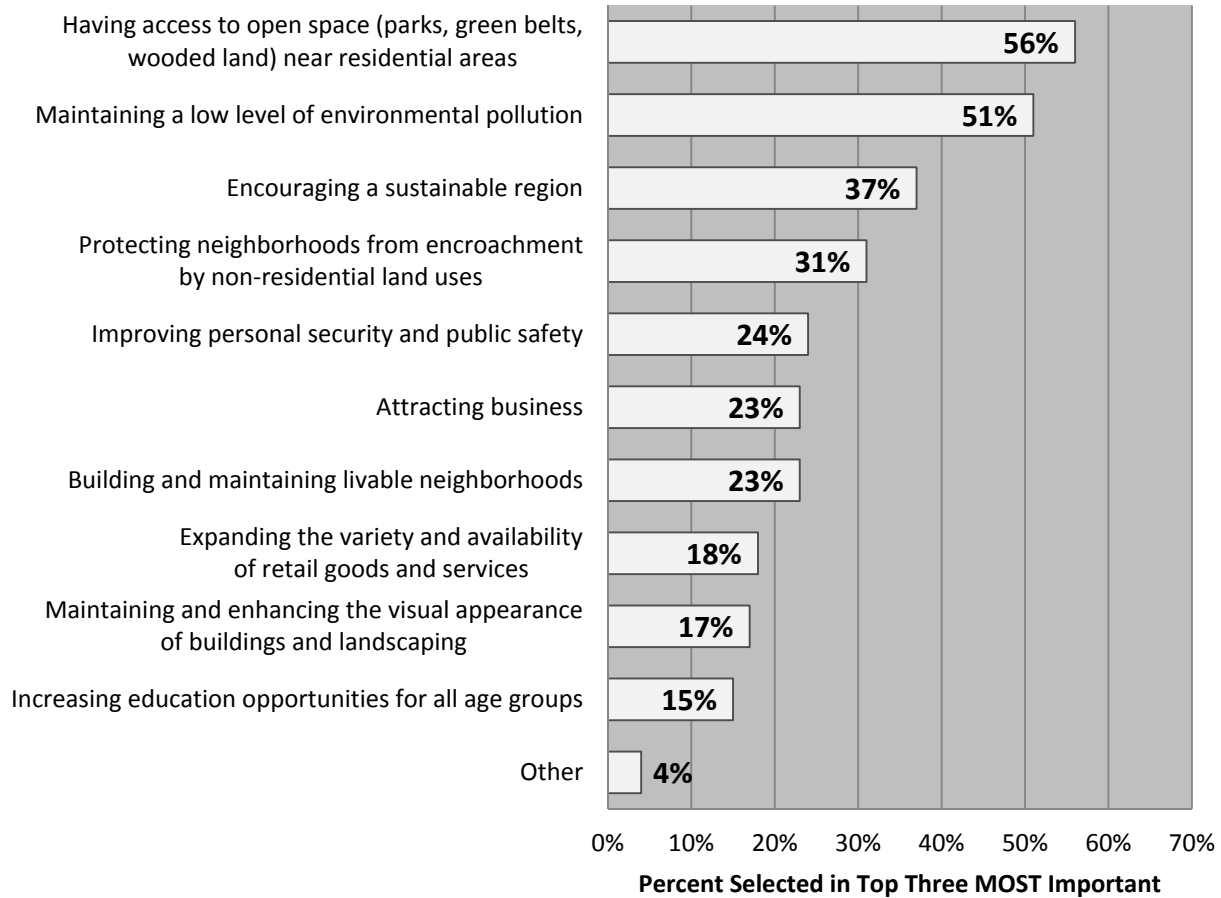

The graphs in this section of the report provide visual depictions of the results for each survey question. The CRPA also provides brief statements summarizing the results of each question or group of questions where applicable.

## **ATTITUDES ABOUT LAND USE AND DEVELOPMENT (Questions 1 through 7)**

### **Question 1: Objectives to Guide Future Growth and Development in the Centre Region**

Respondents were asked to select the three most important objectives which should be used to guide future growth and development in the Centre Region from a list of nine objectives. The top response to this question seems to indicate that respondents highly value the connectivity and accessibility between the neighborhoods where they live and the open spaces and recreational opportunities in the Centre Region. The second highest response reveals strong support for environmental protection and sustainability in the Centre Region. The third highest response indicates an awareness and sensitivity to neighborhood protection. As the Centre Region grows potential conflicts between existing neighborhoods and new development near the neighborhoods may continue.

**1. MOST IMPORTANT OBJECTIVES which could be used to guide future growth and development in the Centre Region.**

\* Write-in responses to “Other” can be found on Page 43.

**Question 2: Rate of Population Growth**

Question 2 asked survey recipients to identify the rate of growth they would prefer in the Centre Region over the next 30 years. Approximately 31 percent of the respondents preferred a low rate of population growth (an additional population of 6,000 people over the next 30 years) and 35 percent preferred a moderate rate of population growth (an additional 18,000 people over the next 30 years). This rate of growth is similar to historic growth rates in the Centre Region. Recent population forecasts prepared by the CRPA indicate that the Centre Region could grow by as much as 22,000 people over the next 30 years.

**2. During the next 30 years what rate of population growth would you prefer for the Centre Region?**

**Question 3: Goal Validation**

One purpose of this survey was to measure the relevance of ten goals initially articulated in the 2000 Centre Region Comprehensive Plan. In comprehensive planning, it often takes multiple years to accomplish goals and in some cases the goals become ingrained in the values and character of the community. The CRPA wanted to understand if survey respondents believed the region as a whole was properly addressing goals over the past ten years and to determine if those goals were still valid. This question asked respondents to indicate if a goal was “still relevant”, “no longer relevant” or “don’t know/not sure”. Goals that are determined to be relevant should be included in the 2010 comprehensive plan update and where appropriate, new objectives and policies should be included to continue implementing the goals.

Relationship between the Centre Region and Penn State University

Respondents continue to value a cooperative relationship with Penn State University and the municipalities in the Centre Region. More than 85 percent of respondents indicated that maintaining a cooperative relationship between the municipalities and the University “to ensure future growth at the University benefits the community” is still relevant. The influence of students, faculty and staff will continue to impact neighborhoods, the economy and quality of life in the region.

Regional Growth Boundary (RGB)

The RGB remains a popular growth management tool among the survey respondents. Nearly 72 percent of the respondents indicated that the Centre Region should direct the majority of future growth into the RGB to efficiently provide public utilities, services, and transit to new

development. About 66 percent of the respondents also indicated that the Centre Region should preserve and enhance the low-density community character in the rural areas located outside the RGB.

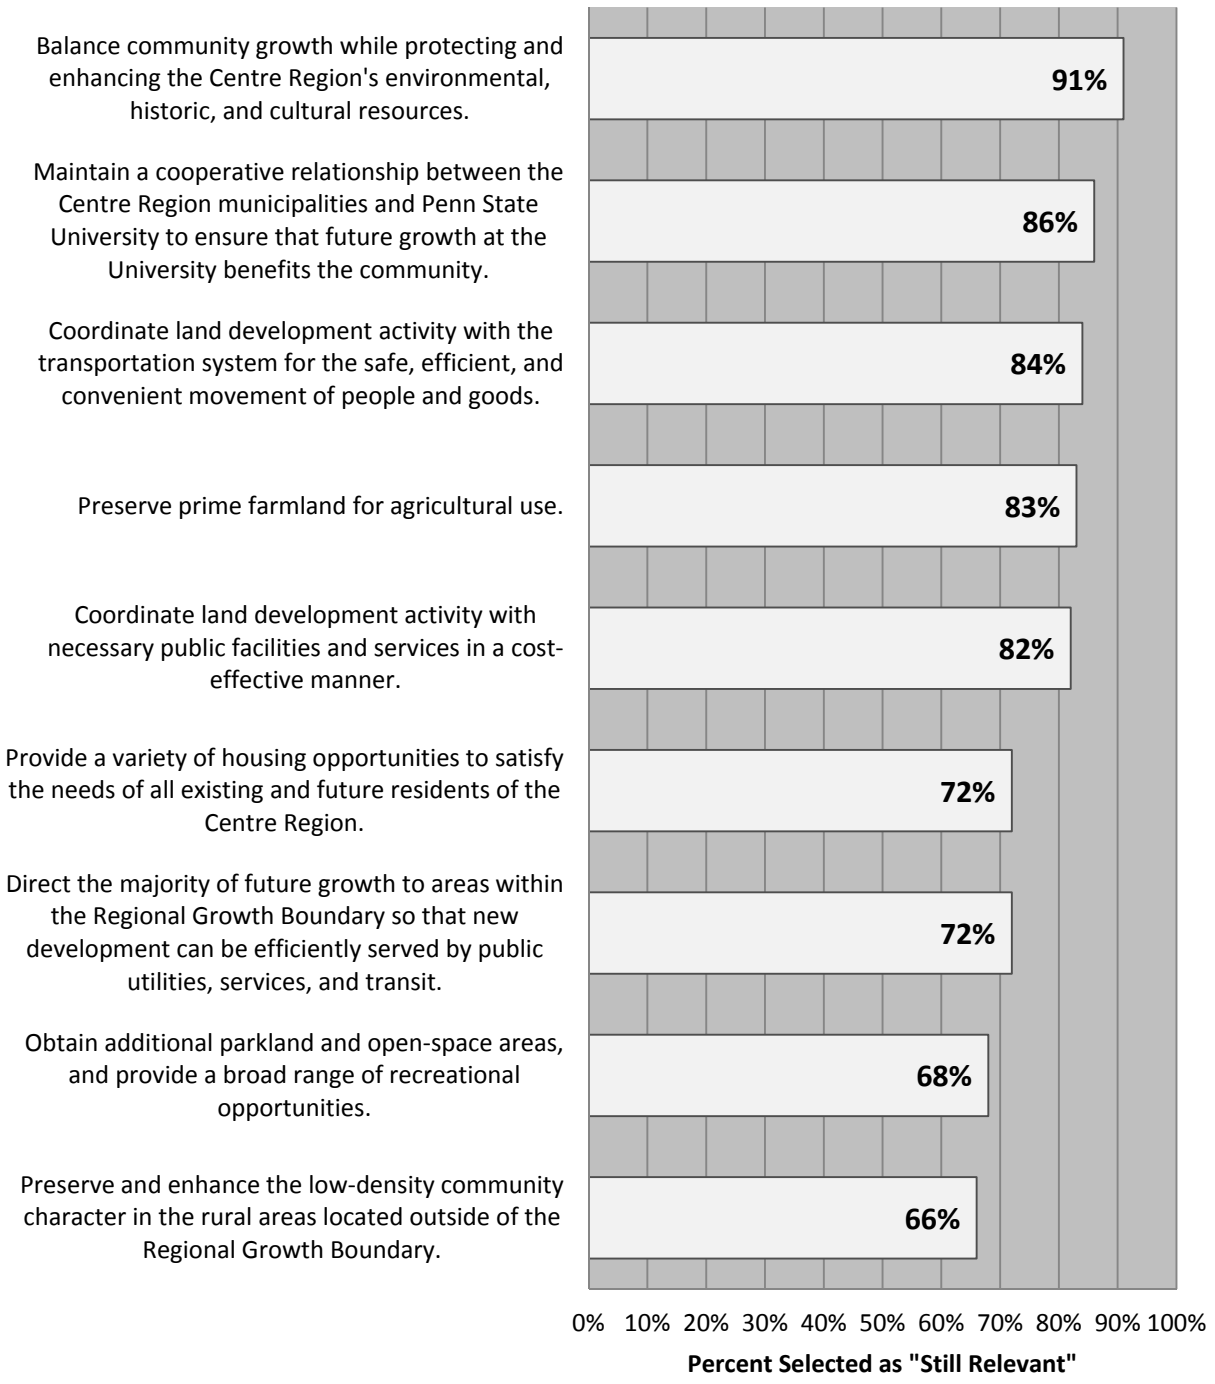

#### Preservation of Farming

About 83 percent of the survey respondents rate preserving prime farmland for agricultural use a goal that is still relevant in the Centre Region. The results indicate some uncertainty regarding the use of financial resources to accomplish this goal. About 39 percent of the respondents agreed or strongly agreed that municipalities should use local tax resources to preserve prime farmland. About 31 percent of respondents disagreed or strongly disagreed that municipalities should use local tax resources for farmland preservation. About 30 percent are uncertain or undecided. Over 70 percent of the respondents however, agreed or strongly agreed that municipalities should use regulations such as zoning or private conservation easements to preserve prime farmland.

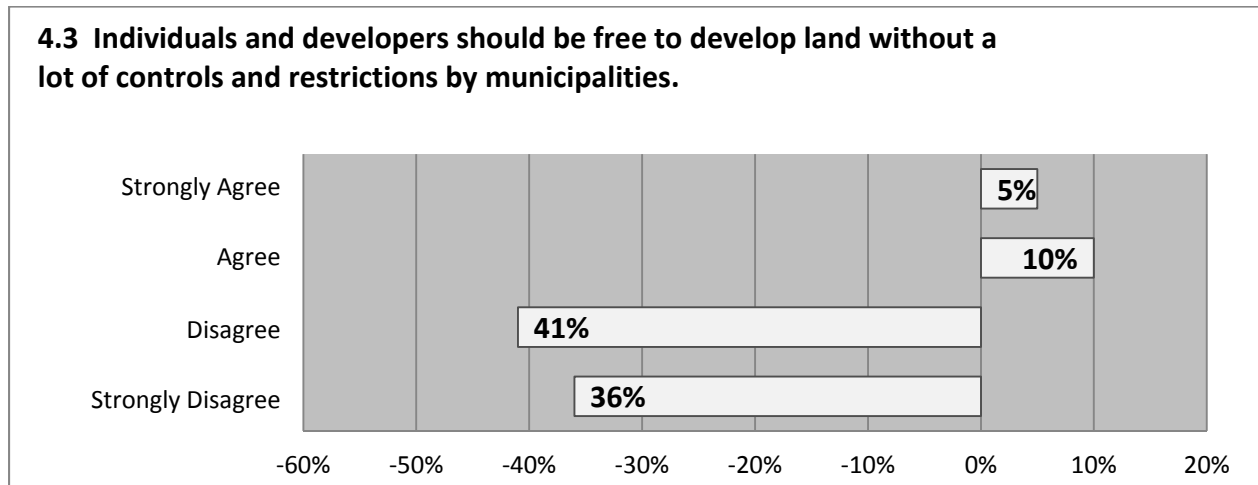

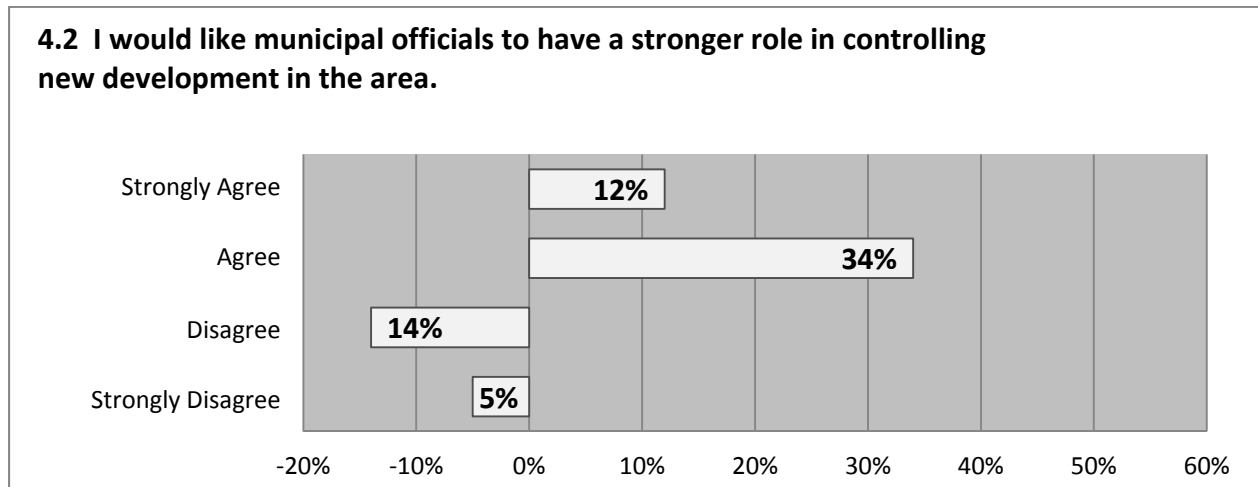

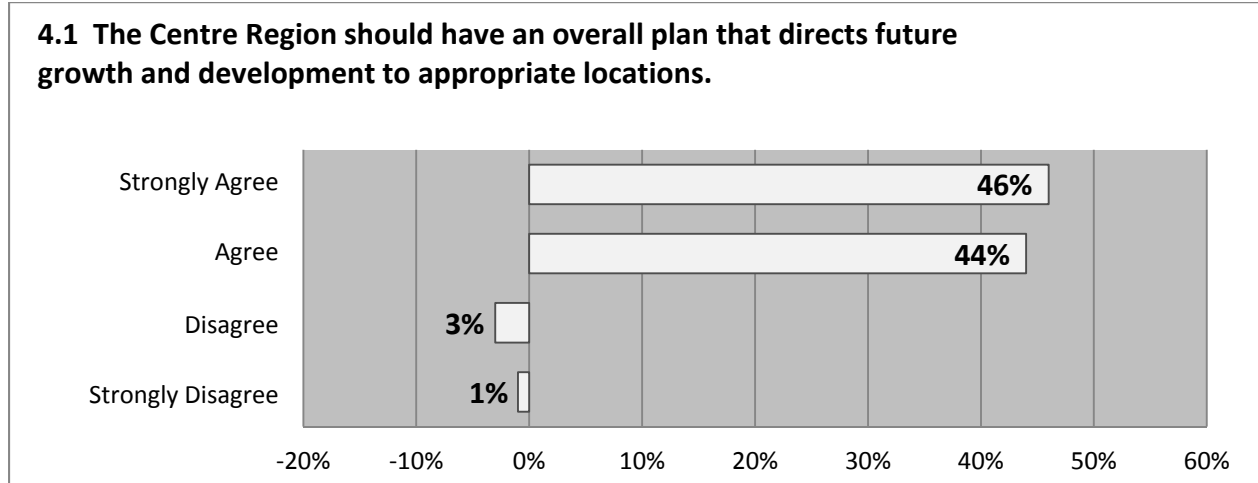

#### Integrated Planning for Land Use, Transportation, and Public Services and Facilities

Integrating land use planning, transportation planning, and provision of public services and facilities remains relevant in the Centre Region. About 84 percent of the respondents indicated this was still a relevant goal. Nearly 82 percent of the respondents agreed that coordinating land development activity with necessary public facilities and services in a cost effective manner is also relevant. These activities have been the foundation of regional planning for decades and respondent opinions reaffirm this.

**3. RELEVANT GOALS. Please select the answer that best corresponds to your current opinion regarding each of the goals.**

**Question 4: To what extent do you agree or disagree with the following statements?**

**4.4 The economic needs of the area should be the driving force that determines what type of development takes place in the Centre Region.**

**4.5 Municipalities should use local tax resources to protect historic landmarks and buildings.**

**4.6 Municipalities should protect historic landmarks and buildings through regulations and law.**

**4.7 Municipalities should use local tax resources to preserve natural resources (air, water, soil, forests, etc.)**

**4.8 Municipalities should use regulations, such as zoning or private conservation easements, to preserve natural resources (air, water, soil, forests, etc.)**

**4.9 Municipalities should use local tax resources to preserve farming.**

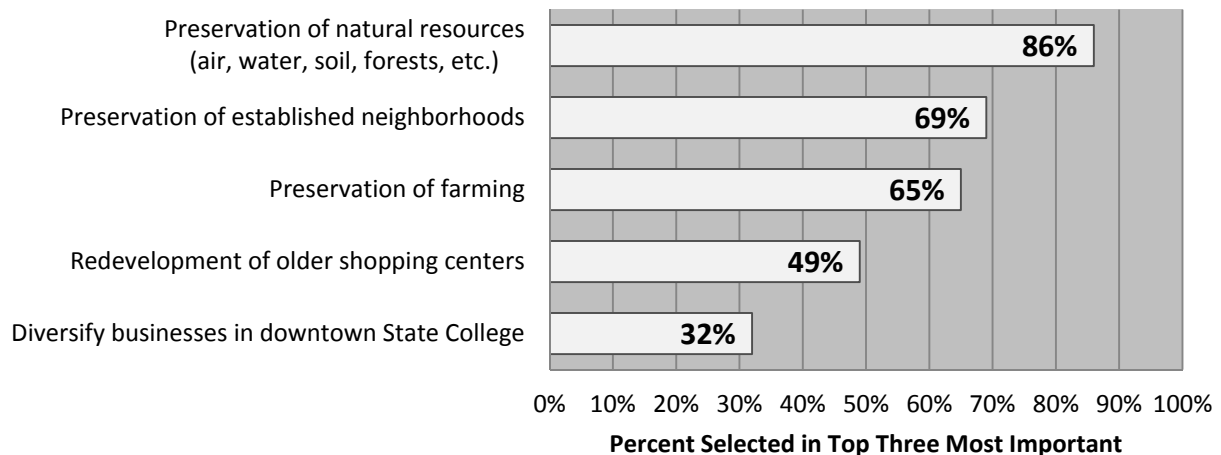

**4.10 Municipalities should use regulations, such as zoning or private conservation easements, to preserve farming.**

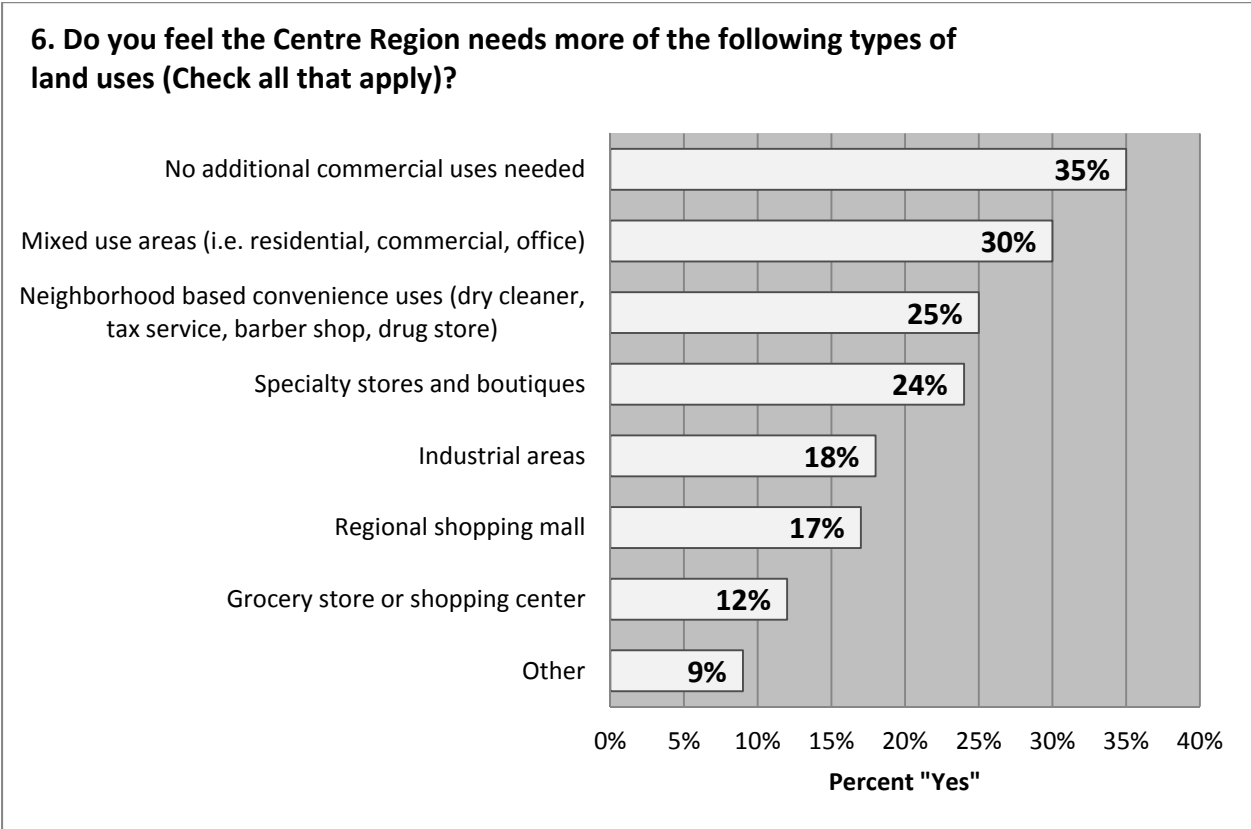

**Question 5: Priority order of issues**

Respondents to the survey overwhelming “agreed” or “strongly agreed” that preservation of natural resources, preservation of existing neighborhoods, and preservation of farming are the highest priority land use issues in the region. All three of these issues clearly illustrate potential areas of land use conflict as the Centre Region continues to grow. Challenges that arise from these priorities are to accommodate growth inside the Regional Growth Boundary while maintaining high quality neighborhoods and to slow development pressures on prime farmland and natural areas outside the Regional Growth Boundary.

**5. Please place the following land use issues in the Centre Region in priority order.**

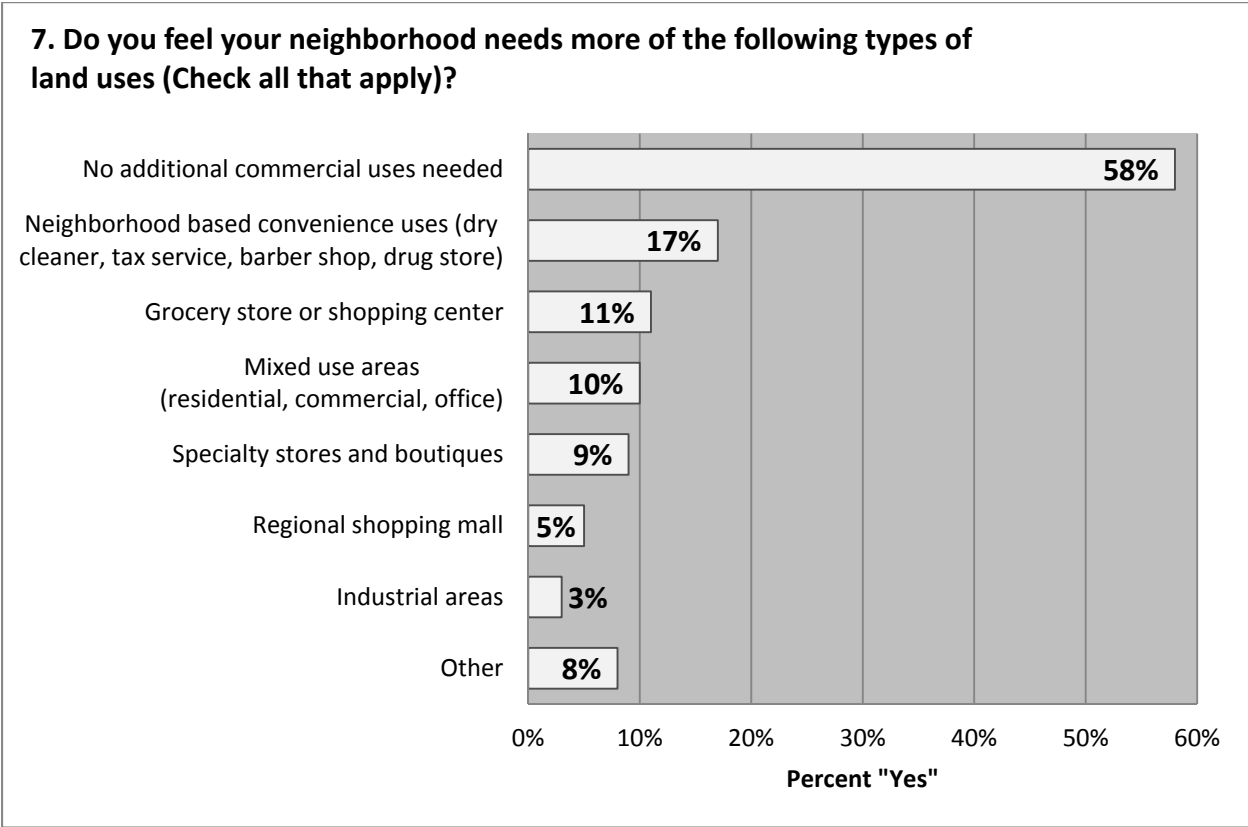

**Question 6: Regional Land Uses**

\* Write-in responses to "Other" can be found on Page 43.

**Question 7: Neighborhood Land Uses**

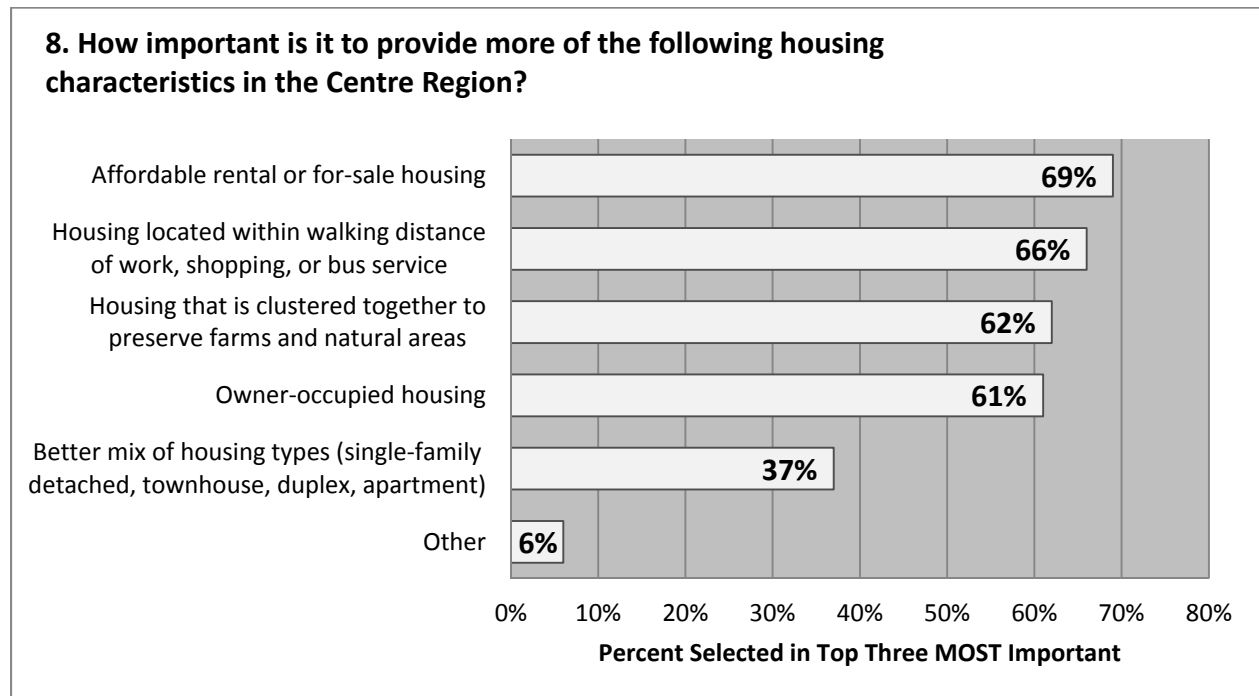

\* Write-in responses to "Other" can be found on Page 44.

**ATTITUDES ABOUT HOUSING (Questions 8 through 12)**

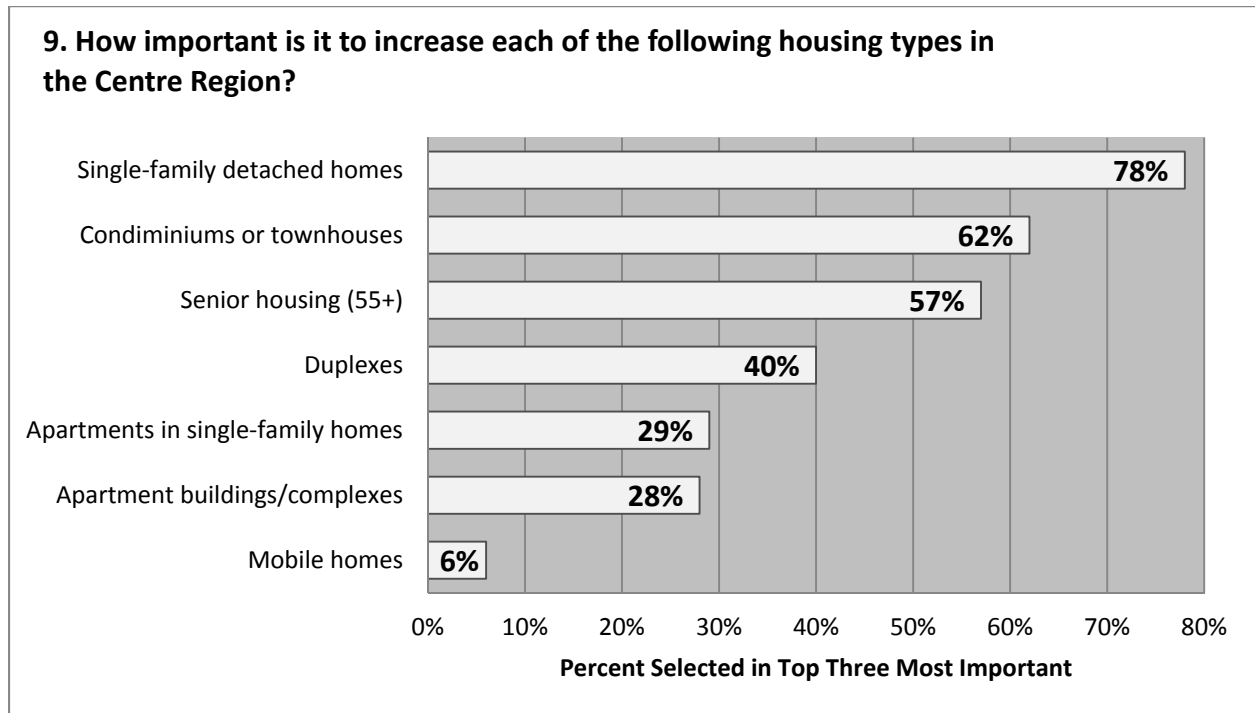

Residents were asked how important it is to increase various housing types in the Centre Region. A majority of respondents supported an increase in single-family homes in the Centre Region, with 54 percent ranking this housing type as most important. Senior housing for resident aged 55+ was supported by one in five residents surveyed. Most respondents did not identify a need for more housing types such as condominiums/townhomes, apartments (whether in complexes or in single-family homes), duplexes and mobile homes. Each of these housing types received less than 10 percent of the responses for most important.

**Question 8: Housing Characteristics**

\* Write-in responses to “Other” can be found on Page 46.

**Question 9: Housing Types**

**Question 10: Housing Costs**

The survey asked residents to comment on the cost of housing relative to their gross household income. Homeowners were asked (in accordance with the guidelines offered by the U.S. Department of Housing and Urban Development) whether the cost for principal and interest, homeowner's insurance, and property taxes exceeded 30 percent of their household income. Renters were asked whether their rent and utility costs exceeded 30 percent of their income. While a majority of the residents responding indicated that their housing costs (rental or homeowner) did not exceed the 30 percent household income threshold, 41 percent of the respondents indicated that their housing costs take more than 30 percent of their household income.

**10. Do you spend more than 30% of your household income on housing costs (Housing costs include principal, interest, insurance and taxes for homeowners; rent and utilities for renters)?**

**Question 11: Availability of Rental Housing**

The survey also asked respondents whether they felt there was enough rental housing available in their price range, and whether there were enough homes for sale in their price range.

The responses to the question of available rental housing were fairly evenly split among those who felt there was enough, those who felt there was not enough, and those who were not sure. These results will require additional cross tabulation to determine whether those who felt they were unable to answer the question are homeowners who have little experience in the rental market in the Centre Region.

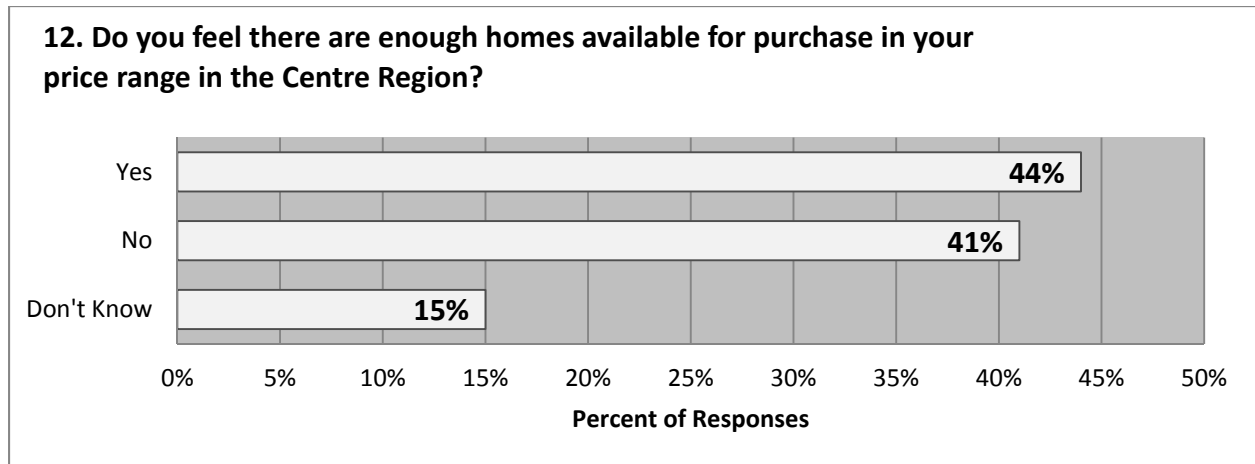

**11. Do you feel there is enough rental housing available in your price range in the Centre Region?**

**Question 12: Affordability of For-Sale Housing**

Residents surveyed about the availability of affordable for-sale housing in the Centre Region were also evenly split between those who felt there was an adequate supply of for-sale housing and those who did not feel there was an adequate supply. In contrast to the rental housing question, however, fewer residents responded that they did not know whether or not there was enough for-sale housing in their price range.

**ATTITUDES ABOUT COMMUNITY SERVICES AND FACILITIES (Questions 13 and 14)**

Respondents ranked community services and facilities highly. Respondents were either “satisfied” or “very satisfied” with public facilities and services that the COG either participates in or administers consistently over 80 percent of the time. Not all services are provided in each municipality in the region and in some cases services not provided or are provided by others. About 36 percent of the respondents were satisfied or very satisfied with composting in the region, although 40 percent of respondents selected “uncertain/undecided” for this service. Respondents rated satisfaction with access to WiFi low, with 33 percent of respondents selected satisfied or very satisfied and 38 percent selecting uncertain/undecided.

Question 13 asked respondents to rate the following services and facilities:

- Police Services
- Fire Services
- Ambulance Services
- Emergency Health Care
- Public Water Service
- Public Sewer Service
- Recycling
- High Speed Internet
- Public WiFi access
- Cable Service
- Electric Service
- Composting

**13.1 Are you satisfied with Police Services in the Centre Region?**

**13.2 Are you satisfied with Fire Services in the Centre Region?**

**13.3 Are you satisfied with Ambulance Services in the Centre Region?**

**13.4 Are you satisfied with Emergency Health Care in the Centre Region?**

**13.5 Are you satisfied with Public Water Service in the Centre Region?**

**13.6 Are you satisfied with Public Sewer Service in the Centre Region?**

**13.7 Are you satisfied with Recycling in the Centre Region?**

**13.8 Are you satisfied with High Speed Internet Service in the Centre Region?**

**13.9 Are you satisfied with Public WiFi Access in the Centre Region?**

**13.10 Are you satisfied with Cable Service in the Centre Region?**

**13.11 Are you satisfied with Electric Service in the Centre Region?**

**13.12 Are you satisfied with Composting in the Centre Region?**

**14. What public services, not listed in Question 13, do you want?**

Question 14 required a write-in response. The most frequent responses are listed below. The numbers in parentheses indicate like responses. In addition, 12 respondents indicated that no additional services are necessary. See page 48 for a complete listing of responses.

- Expanded recycling options, particularly plastics (22)
- Composting, including food waste (15)
- Expanded public transportation service (9)
- More cable and internet service options (8)
- Increased network of bike and pedestrian paths (6)
- Expanded natural gas service to residential neighborhoods (5)
- Fiber optic communications/FIOS (5)

- Public Wi-Fi (4)
- Bikeshare (4)
- More frequent yard waste/brush pickup (4)
- Community education (4)
- More community garden plots (3)
- Recycling centers for lightbulbs and batteries (3)

**ATTITUDES ABOUT TRANSPORTATION (Questions 15 through 24)**

Survey recipients were asked several questions about what mode of transportation they use, and about improvements that should be made to the transportation system in the region.

Sixty-five percent of respondents indicated that their primary travel purpose on a typical weekday (Monday-Friday) was for work, and about 21 percent indicated that the primary purpose was for shopping.

About 85 percent indicated that the main mode of travel for their primary trip was a private vehicle (auto/truck/minivan, etc.). Public transportation and walking each represented about five percent of the mode of travel, and three percent of respondents used a bicycle.

\* Write-in responses to “Other” can be found on Page 53.

**16. What is the main mode of travel for your primary trip?**

Almost 20 percent of respondents indicated that they used public transportation from at least several times per month to on a daily basis. Of the various types of public transit available, CATABus was utilized by over 70 percent of the transit users, and the CATARide and Centre County Office of Transportation paratransit systems were used by about three percent of the respondents.

**17. How frequently do you use public transportation?**

**18. Which type of public transportation do you use the most?**

\* Write-in responses to “Other” can be found on Page 53.

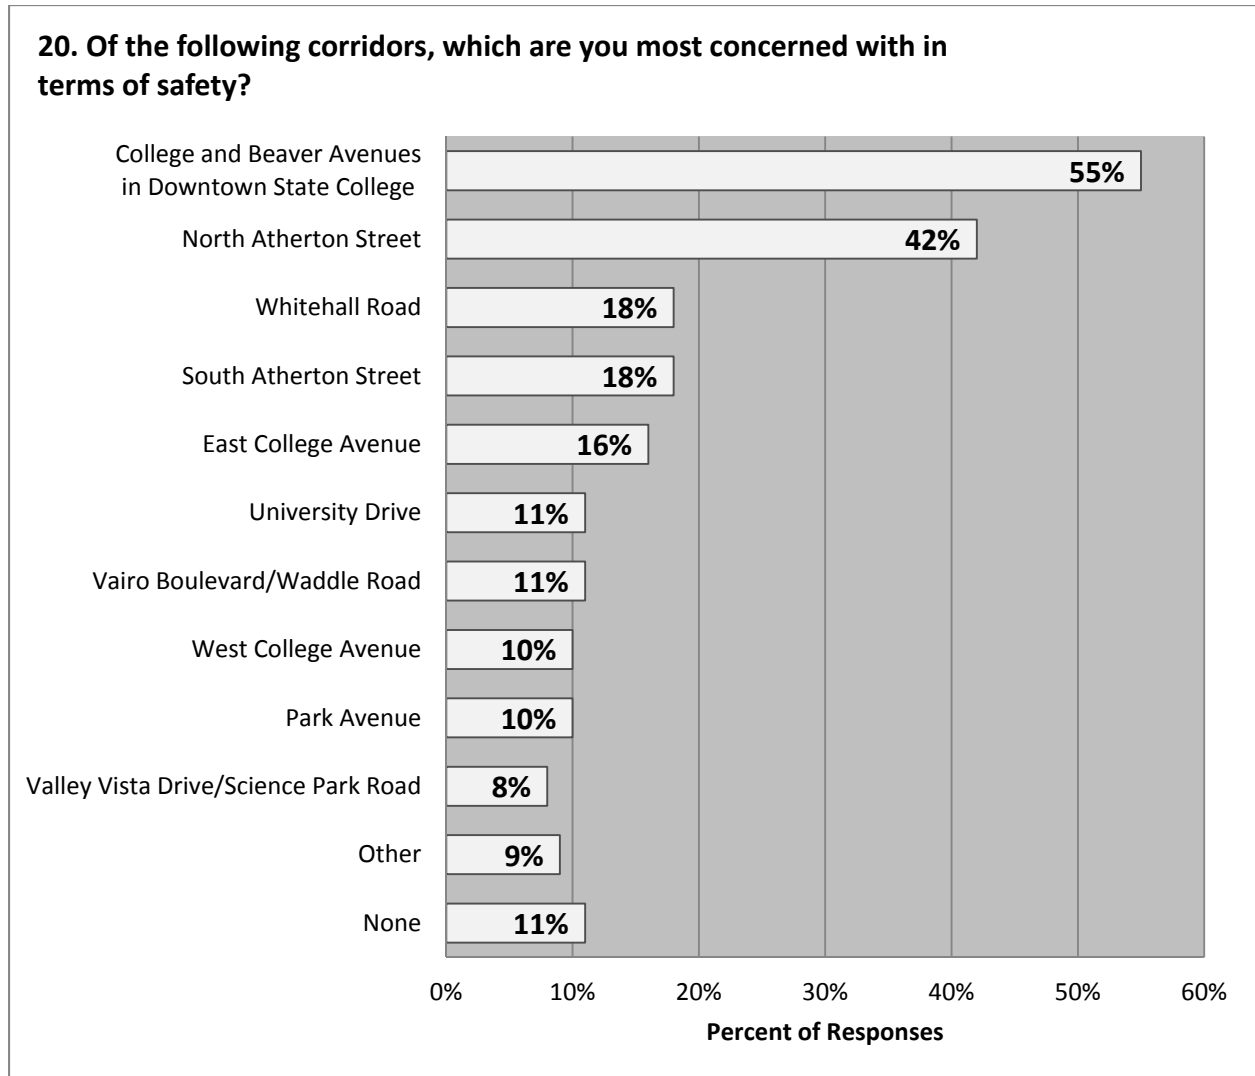

Residents were asked to indicate the five most important factors that would encourage them to use public transportation. Providing more direct bus routes between home and destination, and increasing the frequency of departures from bus stops were two factors listed by about 85 percent of the respondents. Expanded hours of operation was a factor listed by 73 percent of the respondents.

**19. Which of the following factors would encourage you to use public transportation more frequently?**

\* Write-in responses to “Other” can be found on Page 53.

Improving safety for travelers using a motor vehicle, bicycle, or walking has been a priority for local officials. Residents were asked to identify the corridors of most concern. About 55 percent of respondents indicated that College and Beaver Avenues in Downtown State College were a concern for traveler safety, and over 40 percent identified the North Atherton Street corridor as a concern. The remaining corridors listed in the survey were identified as areas of concern by less than 20 percent of respondents.

\* Write-in responses to “Other” can be found on Page 57.

Regarding the top three priorities for roadway improvements, over 65 percent of respondents indicated that focusing on maintaining good pavement quality and bridge conditions was important. About 54 percent indicated that adding sidewalks and bike lanes along roadways was important.

\* Write-in responses to “Other” can be found on Page 58.

For improvements to bicycle and pedestrian facilities, 56 percent of respondents listed adding more off-street bikeways and providing connections between existing sidewalks, trails, and bikeways as being important. About 54 percent indicated that more connections should be provided between existing sidewalks, trails and bikeways.

\* Write-in responses to “Other” can be found on Page 60.

On the topic of improving access to the region, the results indicated that 50 percent of respondents support making major highway improvements to connect the region with Route 322 at Seven Mountains. More passenger air service at University Park Airport was listed by 46 percent of the respondents as being important, and high speed rail service was listed by 42 percent as a priority.

**23. What improvements should be made to enhance transportation access to the Centre Region?**

\* Write-in responses to "Other" can be found on Page 61.

**24. Do you spend more than 15% of your household income on transportation costs? (Costs include monthly vehicle loan payments, insurance, vehicle registration, vehicle maintenance and repairs; bus fare, bus pass, taxi fare, etc.)**

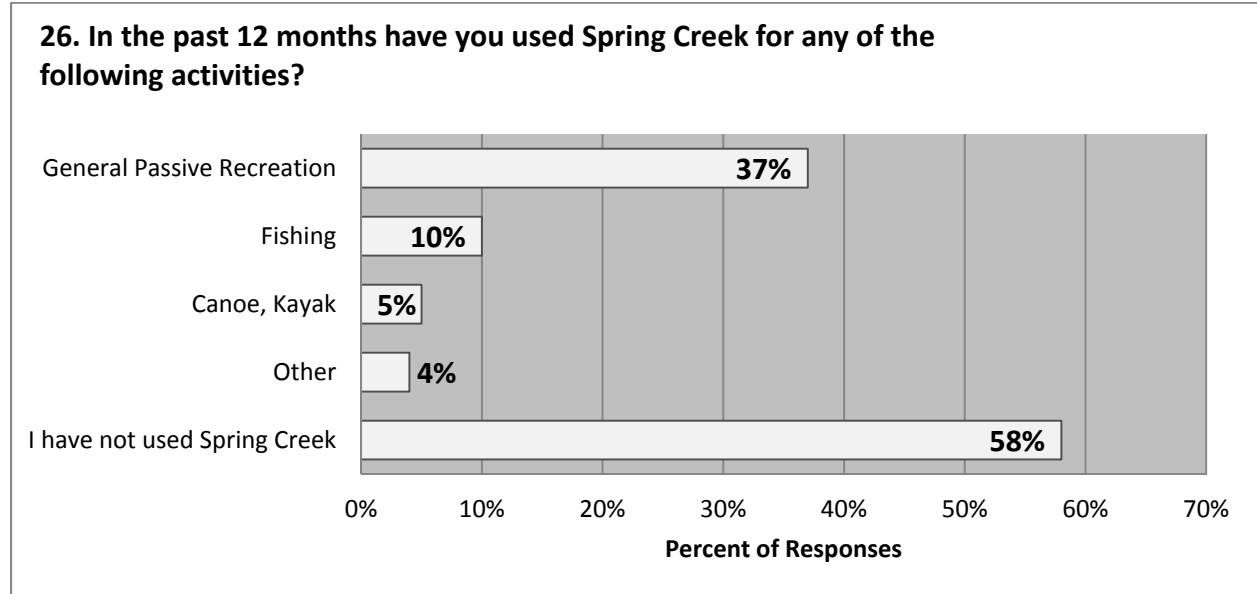

**ATTITUDES ABOUT THE ENVIRONMENT (questions 25 through 27 and related questions)**

Environmental issues continued to be important with respondents to the survey. Having access to open space, maintaining a low level of environmental pollution, and encouraging sustainability throughout the Centre Region were most frequently rated as the most important objectives to guide future growth and development in the Centre Region. A total of 86 percent of the respondents “agreed” or “strongly agreed” with the statement that municipalities should use land use regulations to preserve natural resources.

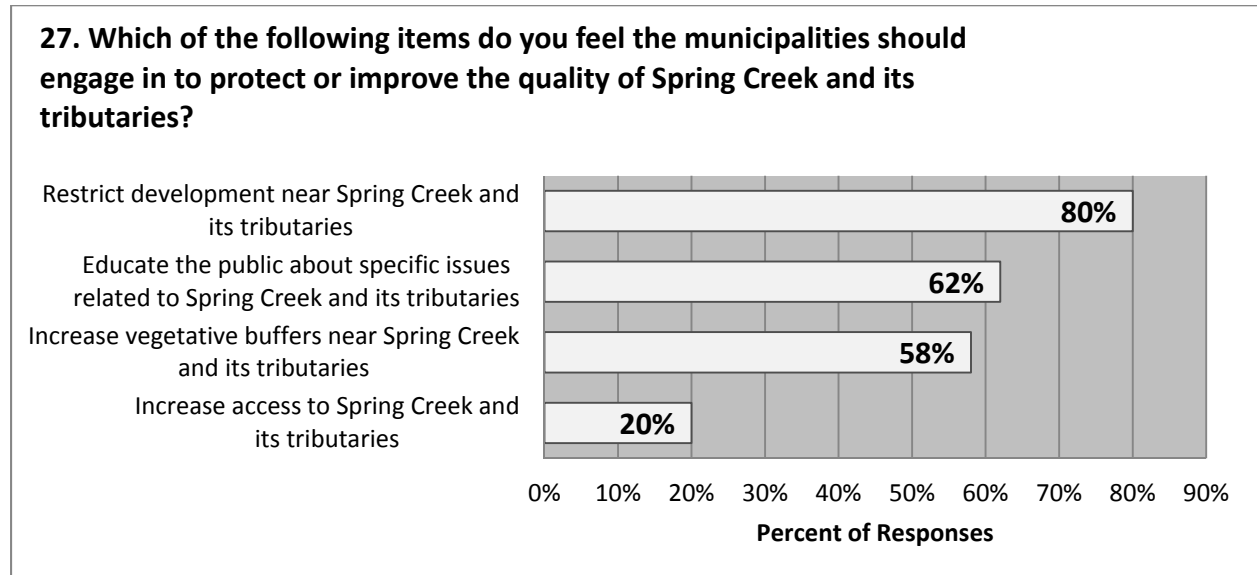

\* Write-in responses to “Other” can be found on Page 62.

Several questions specifically addressed Spring Creek. Over 40 percent of the respondents had used Spring Creek Park in the preceding year for some type of recreational activity. Also, 80 percent of the respondents indicated that municipalities should restrict development near Spring Creek to protect or improve the quality of Spring Creek.

\* Write-in responses to “Other” can be found on Page 64.

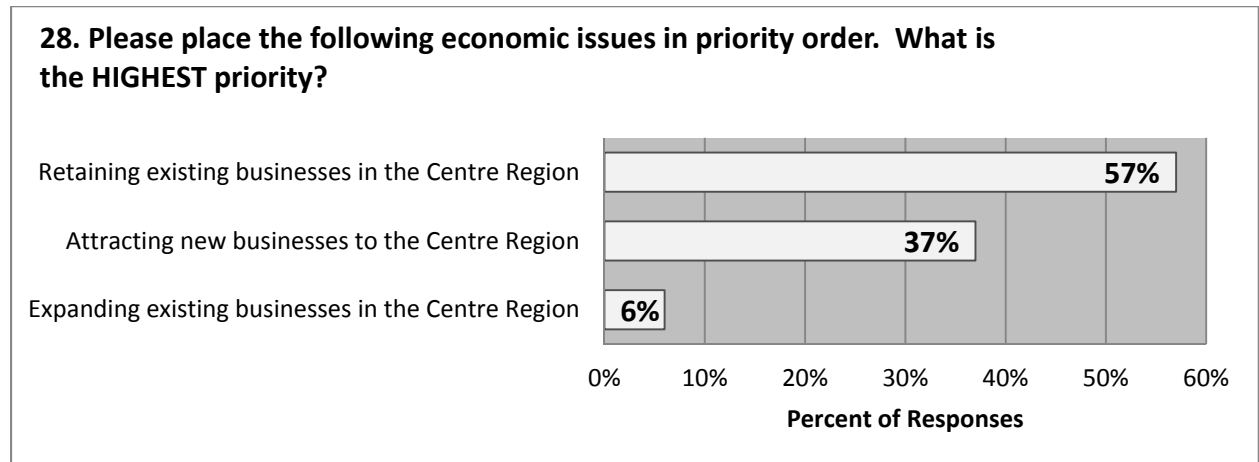

**ATTITUDES ABOUT THE CENTRE REGION ECONOMY (questions 28 through 31)**

Economic development priorities

The survey asked several questions regarding opinions on economic development priorities and issues. Respondents ranked “retaining existing businesses”, “attracting new businesses” or “expanding existing businesses” in priority order. Over 83 percent of the respondents ranked “retaining existing businesses in the Centre Region” as their first or second highest priority. Over 60 percent ranked “attracting new businesses” as their first or second priority.

Incentives

About 40 percent of respondents supported incentives consisting of funding construction of infrastructure such as streets and water or sewer lines and tax abatements or reductions to keep existing businesses or attract new businesses to the Centre Region. One in four respondents did not support offering any incentives.

\* Write-in responses to “Other” can be found on Page 65.

Economic development strategies

When asked to rank potential economic development strategies from a list provided in the survey, respondents placed “continuing to ensure infrastructure is built and maintained to serve existing businesses” in the top five strategies 94 percent of the time. Respondents placed “support local food, direct-farm marketing, buy fresh, buy local and “attract more high tech jobs” in the top five strategies three quarters of the time. Respondents placed “support natural and cultural resource based tourism” in the top five strategies 62 percent of the time and “support recreational-based activities and tourism” in the top five strategies 55 percent of the time.

\* Write-in responses to “Other” can be found on Page 66.

**ATTITUDES ABOUT LOCAL GOVERNMENT AND RESIDENT COMMUNICATION (question 31)**

The survey asked recipients to choose the three ways that they would prefer to receive information regarding community meetings, community issues or community events. This question gages the response to see if there were additional ways to reach residents regarding important meetings, issues or events in the community.

More than 50 percent of the respondents would prefer to read about meetings, issues or events in the municipal newsletter or in the Centre Daily Times. Over 30 percent of respondents would prefer to receive an e-mail notification, view it on the Centre Region webpage, view it on a municipal webpage or receive inserts in utility bills, refuse bills or US Postal Service. Only about 12 percent of respondents would prefer to receive notifications via Facebook or other social media.

**WRITE-IN RESPONSES FOR QUESTIONS WHICH INCLUDED "OTHER"**

**1. MOST IMPORTANT OBJECTIVES which could be used to guide future growth and development in the Centre Region.**

- Attracting manufacturing jobs
- Balance growth vs. infrastructure
- Diversify economy and getting a medical school
- Less code restrictions.
- More rent-to-buy homes. Real estate is very expensive.
- Preventing loss of farmland to residential/commercial use.
- Preventing PSU from buying land!
- Stop all development

**6. Do you feel the Centre Region needs more of the following types of land uses?**

- Should be market driven
- Gas stations around the hospital/Park Avenue area
- More restaurants, especially in parts of town without any
- Unless needed to provide jobs
- I'm satisfied
- Maximize commercial enterprise
- Green spaces
- Apartment buildings for students and non-students
- More local small businesses; no more chain stores
- Use what is already here
- Fewer banks
- Urban farms and community gardens
- More rent-to-buy homes
- Biking trails and dedicated bike lanes
- Community/family recreational center where people can play games, or cards – example YMCA
- Fewer large box stores and more individual small business in all areas
- More diversity in hardware stores
- Dress and shoe store for senior adults
- Nothing to be done – a lot is needed
- Make the Centre Region pedestrian friendly throughout – continue all sidewalks and mark walking lanes in the shopping centers
- More community gardens
- Gas stations
- Convenience stores
- Churches
- Social environment like Dave and Busters

- Diverse restaurants instead of 30 Asians and American
- Use buildings now empty instead of building more shopping centers
- Revitalize Hills Plaza
- Farmland and natural resource preservation
- Stem flight of businesses from the central region
- Use currently empty buildings, that is the green way
- Use existing empty stores (Circuit City, Hills Plaza, or Northland Center)
- Green space
- Better restaurant options
- Big name stores like Babies R Us, Old Navy, etc.
- Downtown hardware and grocery
- Live music and nighttime locales for non-student adults
- Disc Golf Courses
- Places where teens can go and hang out
- Non-chain restaurants
- Planning for land use needs to be based on what's a safe and healthy environment for children, including child-friendly commercial design
- Open space, woods, etc.
- Non-commercial public congregation space
- Outdoor activities like mountain biking, hiking, skiing, etc.
- More businesses focused on eco-friendly options
- Outdoor park
- Bikeshare
- Redevelop Parkway Medical Center to provide neighborhood-based grocery and services
- No, we have enough
- Neighborhood developments
- More freedom for landowners to choose what they do based on their current inclinations and on current needs based on the invisible hand of the market
- The landowners need to be free to supply what people want today, not what someone in COG thinks people will want 10 years from now
- Government should stay out of determining land use
- Dog parks
- More locally owned restaurants would be nice

**7. Do you feel your neighborhood needs more of the following types of land uses?**

- Unique offices INNOBLUE
- Should be market driven
- Pine Grove Mills/PA Furnace could use some restaurants, convenience stores, etc.
- Restaurants
- Unless needed to provide jobs

- No more apartments
- More bike paths
- Urban farms and community gardens
- Small grocery store
- No more banks or hotels
- Gas stations
- Local hardware store
- Expansion of high tech companies
- Social outlet like a meeting place
- Renew empty store near Ollie's
- Fill empty store in the Hills Plaza
- Reuse in Hills Plaza
- Stores in the empty space at Hills Plaza
- Restaurants
- Decent car wash
- Maintenance of trees, shrubs, etc.
- Parks/recreational areas
- Raves
- I want the rental market to expand. Allow for private sector to take advantage of PSU growth. Slow the PSU building of housing units and allow private citizens to recoup, through rentals to students, their investments into the region. Loosen permitting for neighborhood rentals.
- Parks
- Take the former Ames store and bring in a large outlet store such as Homegoods
- Neighborhoods need to be focused on building community and quality of life
- The unique layouts and designs of neighborhoods are being overlooked based on the desire to build more houses in a smaller area. The real estate and housing market is still suffering tremendously. We don't need to attract a larger population and cause even more foreclosures. Maintain the neighborhoods, houses, and families here now. The stronger we make them now, the better we can build in the future.
- Open space, woods, etc.
- Access to bike trails
- Non-commercial public congregation space
- Outdoor activities: mountain biking, hiking, skiing, etc.
- Park/green space
- Not banks
- Zoning should be friendlier to small home based enterprises
- Community garden
- Public square for social opportunities
- Bikeshare
- Redevelop Parkway Medical Center to provide neighborhood-based grocery and services

- No, we have enough
- Whatever is needed at the time the landowner wants to change the use of the land
- More freedom for individuals so everything isn't so much alike
- Government should stay out of determining land use
- Dog parks
- More locally owned restaurants
- More recreational areas

**8. How important is it to provide more of the following housing characteristics in the Centre Region?**

**Ranked 1 (Most Important):**

- Let people do what THEY want
- Less housing
- Let the market decide what types of housing to have within zoning codes
- 55 and over – assisted living combination housing
- More builder friendly government
- Tax money should not be used for affordable housing
- Make downtown less of a ghetto
- More student housing at PSU
- Not denser housing
- Zombie-ready fortresses
- To not overdevelop in existing neighborhoods and drive out valuable members of our community just to bring in higher volume but lower quality.
- None
- Centre Region does not provide housing, individuals should provide it based on what the owners, buyers or sellers consider important.
- Let housing types change as people's needs change. When mortgages aren't available we need more rentals, but as the financial situation stabilizes we'll need more owner-occupied housing.
- Eliminate zoning and codes. Let the market decide. Government only drives up the cost.
- We do not need more housing in the Centre Region

**Ranked 2:**

- Why not stack them up instead of spreading out
- 1+ acre lots with owner occupied housing
- More bike routes. Lemont is cut off by bridges on Branch Road; Branch is very dangerous.
- To provide housing that encourages risk taking entrepreneurs to move here with the intent of long term residence and consistent positive contribution
- I don't think we need more housing
- No changes or additions in housing needed
- Preservation of land
- Housing within public transportation system

- None
- Government needs to get out of the business of making these kinds of value judgments
- The market should decide this
- Less control
- Allow people to change the use of their property based on changes in regional circumstances
- Eliminate zoning and codes. Allow the market to decide. Government only drives up the cost.
- Stop developing the whole town
- Wheel chair accessible, routine units housing
- Need more high rises in different areas with businesses, street level apartments

**Ranked 3:**

- Communal housing; Green zoning
- Smaller houses that are energy efficient
- Require landlords to maintain their property
- Sustainable and eco friendly
- No changes or additions needed
- Housing that is not crowded
- Outlaw leaf blowers
- Energy efficient smaller homes
- We have enough housing
- The market should decide this
- Much less draconian control
- More freedom for individuals to change their homes without having to come begging government for permission
- Eliminate zoning and codes. Let the market decide. Government only drives up the cost.
- S&A homes are turning town into 2030's slum

**Ranked 4:**

- Sustainable housing, zero energy houses or condos
- No changes/additions needed
- Mixed-use, integrated small enterprise/residences
- Do not mix housing types
- Pet friendly housing
- Not important
- Keep student housing away from existing family neighborhoods
- Get over your control fetish
- Less government control. Fewer permits and inspections. More freedom to do things our way.
- Not allowing the State College homebuilder market to be dominated by one builder (S&A)
- Please preserve Circleville Farms – it's a jewel to all residents in Ferguson

**Ranked 5 (Least Important):**

- Sidewalks in neighborhoods and connected walkways and bike paths
- Less student housing; stricter rules on student housing
- Management company to control unruly parties and behavior
- No more housing
- Make sure farms are able to stay farms
- Mixed use small enterprise and residential housing
- Less rental housing
- Rentals restricted to non-student housing
- Energy efficient housing
- Housing within the regional growth boundary
- Houses that have true architectural style and not just builder designed housing
- Student housing that is as far away as possible from existing family neighborhoods
- Green built housing
- Real open development
- Lower costs of building so that we don't have to rely on the same handful of architects, engineers; Developers are making everything so identical it looks like something out of a bad sci-fi movie
- Housing for senior citizens

**14. What public services, not listed in Question 13, do you want (Please list no more than 3)?**

- Stay away from new hires – we are broke; more adult education on an “as you go” basis – must support itself; help local businesses survive with an ombudsman
- Public recreation center
- Get rid of composting and recycling; nothing new or more
- More street lights – especially in township
- Composting (food)
- Better cell phone service; Fairbrook has no signal
- No more services are needed.
- Possibly more flights offered from SCE
- Closer fire hydrants to my residence
- Maintenance of library funding
- Free parking for seniors over 75 years of age; no taxes for seniors (over 75 yrs. old) or veterans; more on-street parking
- Free Public Wi-Fi, Google Internet
- Expansion of recycling to include more
- Pick up yard waste – provide containers to do so
- Harris Township should pick up brush more than twice a year
- FIOS
- Better, less expensive bus system

- Education; less drinking among PSU student population; more industry/more employment
- Improved medical facilities
- Composting
- More gas lines
- The ability to have more than one electric, gas, and water company to choose from
- Recreation, education, trees
- More bike paths
- Better television services; sewer fee for amount of water you use
- Have composting in the townships in addition to the Borough
- Neighborhood scale, renewable energy electric power plants
- Bike paths
- Real estate is expensive – more rent-to-buy homes; tutors to teach special needs kids
- Composting; more recycling options (plastics)
- Better Business Bureau to monitor services provided by handymen
- I wish we could recycle MORE plastics here (yogurt containers, etc.); composting details are too limited in terms of brush that can be placed at curbside, although I do understand it may not be feasible to do more garden brush (I don't mean vegetables)
- Affordable, quality healthcare and general physicians; Mt. Nittany isn't good (general physicals also not good quality); reasonably affordable communication provider (cable, internet, phone)
- Sidewalks regularly available and constantly maintained; bike paths
- None
- Expand public mass transit
- More CATA bus service
- More bike paths
- Curbside recycling of batteries
- Lower cost sewer service (The rate is one of the highest in PA)
- More public transportation
- Public rides; more jobs; more daycare
- Recycling to accept all plastic and paper; service to collect compostable between wastes; localize collection stations for unused pharmaceutical, paints
- None. You already have your hand in my pocket too deep.
- More recycling of all plastics
- Mandatory recycling
- Recycling of vegetable waste; recycling of yogurt/margarine containers
- I think fire service should be tax payer funded
- Public competitions
- None. Don't spend any more money
- Improve recycling for everything; improve recycling drop off points; composting for (private) residence
- Parks and recreation services

- 5 deposit return on glass and plastic bottles
- Standard trash/brush/junk removal between townships
- Expanded recycling services, more plastics etc.; earlier morning bus service
- Composting Harris Township
- Free street parking; police corruption investigators; water fountains and/or water bottle fill stations
- Choice of trash collection
- PSU to be most accountable to Centre Region for student damage and behavior, not residents and business
- Expanded public transportation (a bigger and faster CATA)
- No more taxes for public services
- Composting in College Heights (collection)
- Nothing. Why should government take care of our every want and need?
- Help making choices to find reusable energy providers
- More recycling downtown
- Public transportation
- Public wireless internet expanded to all borough areas
- Better dog waste enforcement in parks; routine police presence in parks; better synchronization of lights on Beaver and Atherton Avenues
- Consolidate refuse recycle in community area would be convenient; stop and eliminate would be a personal plus
- None given budgetary restraints
- Less services; more personal freedom and responsibility
- Community center; I miss Webster's, where people would gather to talk, read etc. It was a great public service on Allen Street.
- Additional bicycle paths
- With regard to recycling, we seem to recycle only the bare minimum relative to other parts of the country. I'd love to see the Centre Region support more extensive recycling efforts.
- Yard debris pickup (tree limbs, etc.)
- FIOS service
- FIOS to the home
- More cable and internet service options
- Recycling centers for the more uncommon household items: light bulbs, batteries, etc.
- Halfmoon Township is not part of the CRPR discounted programs. We also use DISH for TV because of dislike of Comcast which is more expensive. There is also no composting in Halfmoon, which I guess is due to residents being able to provide for themselves.
- Waste disposal; recycling for paint cans, batteries, etc.
- Police transparency
- More natural gas service to housing
- Recycling – we have seen recycling trucks dumping their stuff in regular dumpsters

- More community garden access
- Resident usage fee for Center Parks and Recreation for Halfmoon Township residents
- Although recycling service is provided, it is far from adequate. Many more items could be picked up and recycled (particularly plastics, foils, etc.)
- Gas service
- Composting in wider availability
- More frequent leaf & debris removal/; better street signage
- More options for recycling plastic
- Better recycling pick up across the board, meaning a wider range of taken recyclables from home and business pickup.
- In town bike sharing program such as this: <http://www.bikepottstown.com/>
- Better connection of bike paths to outlying areas such as Kaywood and Willowbrook
- More electric providers – West Penn has a monopoly. I do not care for their business practices, but I have no other option but to go through them. Even if I choose another electric supplier, I am still billed through West Penn.
- Natural gas lines for private residences
- I value the public library and all its programs; I am grateful for public transportation
- Available public garden plot; better use of Wal-Mart for recycling (incl. mercury light bulbs) and information dissemination related to the community; public parks that aren't baseball fields
- I'd like more competition for high speed internet – I feel like I'm severely limited in my choices.
- Bike lanes; hire seniors or homebound individuals or stay-at-home parents to guard streets for kids walking to and from school and all kids within 1 mile of their school can walk, therefore reducing busing emissions and helping obesity rates
- More animal shelters with good facilities, space; and more animal control wardens
- Animal control
- Greater recycling: composting opportunities and awareness
- More cable and internet options beyond Comcast
- Consolidation of services at the county level to save duplication and redundancy
- More dog parks
- Better public transportation
- None – save money
- Composting
- Library
- Free public Wi-Fi in all outdoor spaces
- Transportation
- I would like to see food waste composting expanded; Community Education facilities
- Year-round recreational facility with pool
- Small business counseling service and tax advice
- Bikeshare
- Shut down Allen Street for a public park

- Bikeshare
- Bikeshare
- Pickup at the curb more kinds of containers for recycling – examples are yogurt cups, plastic food containers, etc.
- Enforcement of air quality standards and other environmental standards
- Metro service in the future
- Car and/or bike share service, although that could be privately run
- Municipal police services – Halfmoon residents rely on the state police and depending on their work load, their response time can be slow
- DSL internet connection
- Disposal of hazardous materials
- Consolidated local police, fire and emergency services
- More recycling items
- None
- More frequent busing
- Halfmoon Township needs public sewer service
- More public services mean higher taxes, and I want less taxes
- Bus service expanded
- Bike and walking paths which connect to commercial areas
- More recycling options than what is now available
- Other cable choice; fiber optic
- Recycling/composting of food waste; public green space in vicinity of Beaver Canyon; increased network of bike and pedestrian paths
- Right now, I want FIOS! But 8 years down the road, that may not be the most desirable type of internet service. I want local governments to get out of the business of granting monopolies to these kind of service providers, so that we can let demand and competition determine what's available (fire, police, and ambulance excepted)
- Community Bike Rental; municipal owned Cable Service; public gardens
- I want local government to get out of the way of those who want to provide 21st century services (fiber optic internet to homes) and let them compete with individuals for our business. Maybe we would get a decent service around here not just Comcast, or Verizon DSL
- Curbside recycling needs to be stopped. It's too costly and adds to air pollution with a vehicle stopping and starting every 200 feet; more people would benefit with community drop off containers, reduced cost.
- Recycling of all plastics
- Public Wi-Fi; composting
- More dog parks
- Park-ride service to/from Boalsburg
- More economical water, sewer, and especially trash & recycling service/fees; do NOT mandate composting – we can manage that without your help.

- Expansion of access to natural gas lines for residential heating
- Snow removal and winter road maintenance in State College Borough is poor compared to Ferguson Township
- Expanded recycling program
- Paid professional fire services instead of all volunteer; competitive municipal waste disposal (choice in service providers); pay as you throw (PAYT) payment structure of municipal waste disposal rather than monthly bills that hinder conservation.
- Public transportation; snow removal services
- Public transportation, buses

**15. In a typical week (Monday-Friday) what is the primary purpose of your travel?**

- Volunteering/Helping others (4)
- Living
- Retired
- Social visiting
- Church
- Whatever I need to do
- Kids (4)
- Vocational rehabilitation center. Opportunity for centre clubhouse
- Errands (2)
- Checking things out
- Dining

**18. If you use public transportation, which do you use the most?**

- Taxi (9)
- Planes/city subways

**19. Which of the following factors would encourage you to use public transportation more?**

**Ranked 1 (Most Important):**

- Maintenance of sidewalks
- Can you find a way for public transportation to be self-supporting and an effective use of my time? Then I would consider it.
- More friendly people
- Loss of driving license
- Maybe if I lost my job and couldn't afford a car
- Safer bicycle routes
- Child safety seats on buses
- None – I need my car for work
- Remove bus service from my neighborhood
- 7 days a week

- Nothing, I don't need it; I mostly walk. I might use it for special events, such as the Beer Festival, etc.
- I work at home so no transportation is needed
- Sunday service
- I won't use public transportation
- Public transportation is just like riding the school bus, which was hell. As a citizen I'm free to come and go as I please by whatever means I choose, and that's the way it should be. I'm tired of my tax dollars going for nearly empty buses (or when they are full, subsidizing Penn State students living off campus)
- CATA doesn't service where I need to go
- If it was possible to have expanded service that would allow me to get to work on time, I would ride the bus
- More service on loop during summer
- Bikeshare
- On-time arrivals and departures
- Grocery store focused shuttles that permit grocery bags
- It's not for me
- I think Centre Ride is a great service to seniors
- Not having to stand
- Bus service is wonderful – hauling things on the bus is a problem.
- Actually, I enjoy walking
- No desire at this time to use Public Transportation.
- I would have to stop being selfish
- Would not use public transportation
- Won't ever use it
- Children below the age of 16 should be exempted from paying bus fare
- I don't travel enough to need it
- More frequent service to outlying areas
- N/A, I go from job to job in the afternoons. I need a vehicle or else I couldn't work both jobs
- No option – I commute from Williamsport
- Friendly, safe drivers
- Increased flexibility with the Ride for 5 program
- My job requires that I travel all over the state, so I can't use public transportation
- Too many stops for me with my children
- Will not use – I prefer my vehicle as most cost effective
- I have no need for public transportation
- I would not use it
- Reduce all the empty buses running around
- CATA is now efficient
- Very high price of gas

- Traffic gridlock
- Education
- Keep running the white loop over the summer
- No need for public transportation
- Do not want to take the bus
- Inability to drive
- Not needed for me and where I live
- I don't want to ride the bus
- No more free rides for PSU students
- No need to use this time
- It is good now
- Will not use
- We are satisfied with current services
- CATA W bus doesn't run on Sundays
- Would most likely never use
- I don't like buses
- I walk to town
- A bus should stop at all stops not just their individual route
- Better incentives like Ride for \$5 and higher gas taxes

**Ranked 2:**

- Nothing
- Not desirable to me
- Easier multiple bike carrier on bus
- If public transportation provided the flexibility and comfort people want (like our cars do)
- Route 322 Business
- Able to access any bus and Route from the CATA depot
- Change in work needs
- We don't need public transportation
- Route 550 Bike Lane
- CATA is terrific
- I enjoy walking
- If you put a bus stop at the end of my driveway I wouldn't use it
- More direct route from my home to work
- Would not use it
- Worthless bus route elimination
- Intersection of South Pugh and Ellen Avenue
- A bus stop for the blue loop near the lion statue
- No need for public transportation
- Anywhere there are cops

- Student free buses
- Expanded summer hours

**Ranked 3:**

- If the drivers could stop if they see you running for the bus
- You need to provide more choices than just those that encourage expansion of CATA and the subsidies to it, because we DON'T all agree with doing that
- None of these, service is adequate
- More convenient stops and times
- Expanded hours during PSU breaks
- Create bike way loop(s) on existing roads, e.g. adequate shoulders on connected roads
- These are not significant factors
- I enjoy walking
- Would not use it
- Less public control
- LESS bus stops
- Better decorations on the sides of the bus
- Being aware that the service is available and simple to use; is a phone application for my phone

**Ranked 4:**

- It's all about the same
- Still nothing
- Ability to set my own schedule
- All 4 above are fine as is
- None of these, service is adequate
- Personal time available
- These are not significant factors
- I enjoy walking
- Higher parking fees
- None
- Would not use it
- I just need to make the effort
- Empty buses
- More frequent long-distance service (e.g. to Bellefonte)
- NONE

**Ranked 5 (Least Important):**

- Nothing
- None apply
- Nothing
- All 4 above are fine as is

- None of these, service is adequate
- Increased gas prices
- I have all this already
- I enjoy walking
- Bus to Altoona
- Would not use it
- Make the transit system sustain itself
- Ease of use--maps showing routes
- Restart service in my neighborhood
- The rest of these are not ordered
- Do you really expect us to keep doing this
- NONE
- Lateness

**20. Of the following corridors, which are you most concerned with in terms of safety?**

- Halfmoon Township
- Route 550
- They are ok now as is
- Route 322 East
- Blue Course
- Bicycle traffic on Whitehall and Tadpole Roads
- Blue Course Drive
- Potters Mills Route 322
- Fox Hollow – gravel in bike lane
- Aaron Drive area
- Branch Road
- Anywhere there are cops
- Route 550 Bike Lane
- All poorly lit residential areas
- Gerald Street
- Speed is bad in Patton Township
- Fox Hollow Road and Toftrees Avenue
- Business Route 322
- Warner Avenue, Oak hill intersection
- Anything poorly
- Blue Course Drive
- Campus alleys
- No left arrows on University to South Atherton, Route 45 West
- Bicycles holding up traffic
- North Oak and Sylvan school crossing

- All equally
- Waupelani Drive
- Intersection of West College and Route 45
- Calder Way
- Parkplace
- Frat Row
- Stormstown
- East Branch Road between College Avenue and Atherton Street
- Intersection of South Pugh Street and Ellen Avenue – poor visibility
- Circleville Road near Park Hills
- Speeding in residential neighborhoods
- West Aaron Drive
- Waddle Road Exit off Route 322 West (I-99S)
- Alley between College and Beaver Avenues
- Traffic flow on Meeks Lane
- Warner Boulevard
- Route 550
- The corridor that is used to borrow money (sell bonds) in a vain attempt by government to provide perfect safety to everyone
- Colonnade parking lot
- Route 322 at Potters Mills – Too many people have died there; find a way to make the bikers use all those bike trails we paid for instead of riding in the middle of the roads and creating hazards
- Route 322 to and from Boalsburg
- Calder Alley (Way) after 11 PM is non-stop drunk people picking fights with every passerby
- College Avenue & Atherton Street

**21. What roadway improvements should be made in the Centre Region?**

- None
- none
- Increase speed limit on West Whitehall from UniMart to the intersection at Fairbrook and Tadpole Road
- Lower curbs and make them rounder – It's like a wall on the side of the road
- In town at all lights add red "stop for pedestrian crossing sequence"
- Construct Eastern Inner Loop
- Left hand arrows at all intersections
- Reduce parking and road options to make driving inconvenient
- Create bike way loop(s) on existing roads, e.g. adequate shoulders on connected roads
- Snow removal at bus stops; more time to cross North Atherton Street, especially from Clinton Avenue and Blue Course Drive
- I love the rain garden concept – would love to capture some of Gerald Street runoff into my yard

- Nothing
- Something to slow down traffic
- Fewer traffic lights replaced by roundabout or routine
- Bike lanes on roadways
- Stop people from running red lights by fining them
- Lights on the Blue Course Drive
- I'm tired of always seeing improvements made to our roads. I wish better quality roads would be constructed from the start.
- Make bike lanes smoother
- Waddle Road
- More police presence
- More turning arrows at intersection
- West Whitehall Road needs a sidewalk from YMCA to South Atherton
- Complete the Outer Loop
- Take steps to get people out of their cars and into more sustainable modes of transportation
- Reduce the number of traffic lights
- Restrict bicyclist from using roads without bike lanes – Fox Hill Road for example
- The left turn light on Burrows Street and East College should be put back
- Make duration of yellow lights longer
- Add sidewalks & bike paths AWAY from the roads, not within the roadway
- Sidewalks and bike lanes
- Study the Waddle Road exit off 322 West
- Better DUI checkpoints
- Add mirrors to intersections on College Avenue that don't have a traffic light to make turning onto College Avenue easier
- Bike lanes, especially around schools
- Repave Easterly Parkway
- Bike lane on Route 550
- More frequent line painting
- Outlaw loud annoying music blaring from cars
- The most important project is making Route 322 a 4-lane highway from State College to Potters Mills.
- Use traffic circles instead of lights to keep the cars moving
- Make certain that traffic lights sense smaller vehicles such as motorcycles
- Better control of bikes on high traffic rural roads
- Absolutely do NOT add more traffic lights – the number of lights in this town is getting out of control. Also, the new left turn lights that turn to a red light (not allowing you to turn left even if there are no cars coming the other way) are non-essential. I haven't found a single person yet that understands the logic of those lights

- Cut back the spending, especially when it's "free money" from state or federal grants, because it isn't free! Our taxes pay for those too. Opt out of grant programs that come with 'strings.'
- No more bike trails until the bikers stay on the existing ones; no more pedestrian islands when they just stand further out in the streets anyway; no more stupid traffic circles; no more social engineering like traffic calming and stupidly designed parking lots
- Widen roads to allow bikes – bike lanes are not efficient
- Keep bicycles off the streets
- Synchronize traffic lights on major corridors
- Reduce the number of traffic/signals lights
- Making a left turn from Valley Vista onto Circleville is so dangerous without a turning arrow light
- Increase speed limits on I-99 to 65 mph
- Less traffic lights
- Encourage traffic circles rather than traffic lights

**22. What improvements in bicycle or pedestrian facilities should be made in the Centre Region?**

- None
- None
- Fine for now – leave it alone
- Enforce bicycle traffic infractions
- Eliminate use of stop for pedestrians in crosswalk signs in the middle of the roadway
- Keep them off the roads
- None
- Clear bike lanes of gravel
- Anything and everything
- Offer municipal bike shops and bike maintenance services
- Consider moving obstacles blocking North Atherton and Blue Course Drive crossing areas
- Drivers turn into Atherton and ignore pedestrians
- NONE
- We don't need any of those
- Longer stop lights from crossing
- Parking facilities
- Keep bikes on paths when available and off the street
- There's enough already – town is already bike/ped friendly
- Enforce cross walk areas – especially downtown
- Money to educate all parties: pedestrians, cyclists, and motorists
- More covered bike racks
- Too many bikes on Whitehall Road
- Leave it alone
- Good the way it is
- Mandate bicycle licenses for biking and traffic skills

- Improve the pedestrian signaling system downtown. Cars are given the green light to turn while pedestrians are given the walk signal. Both think it's safe to go, neither are prepared to yield. This is dangerous. The signals should not be concurrent; they should be consecutive, as they are in large cities
- Slow the traffic on Westerly Parkway at the High School
- Force bikes on the road to follow ALL traffic laws. Bikes are not cars. If they cannot drive the speed limit and do not have turn signals they should not be on the road. Also, mid block crosswalks are stupid. The police should be out watching for people not crossing the street properly.
- Enforce existing laws
- Add more off-street bikeways
- Continue rail-trail through and beyond Toftrees
- Bike lane on Route 550
- None
- Increase pedestrian, cyclist, and motorist education programs
- Force bikers to actually use bikeways
- Clear markings for crosswalks and for vehicles to stop
- Realize that bike lanes are not feasible on all roads
- Stop spending money on these boondoggles! They are nice-looking bells and whistles that provide little function to the vast majority of residents and taxpayers
- Enforce bike safety rules
- Enforcement by police when bikes ride the wrong way on the road, run stop signs and red lights (right in front of police cars), ride 4 or 5 abreast on Oak Hall Road or Route 550
- Widen the roads and enforce the laws
- More ticketing of bicycle violations – an example would be running red lights
- Leave it alone and focus on the road and bridge repairs! Bike lanes next to bike paths in the borough especially, are nonsense
- User fee for bicycles/license
- Cameras on historically bad intersections and citations for pedestrians who walk in front of cars
- Enforce pedestrian right of way in crosswalks
- Enforce NO bike riding on sidewalks or riding wrong way on roads

**23. What improvements should be made to enhance transportation access to the Centre Region?**

- None
- Bus service to airport
- Local bus routes from townships to town
- Air service to Harrisburg and/or Baltimore
- May have too much – run through traffic on I-99 is very disruptive to nature
- More bus service to major airports: Philadelphia, Pittsburgh, and Harrisburg
- None – save tax payers money

- Promote better railway travel; secure alarms
- Air service to Pittsburgh or anywhere except Philly
- None – we have enough people
- Any rail service would be a great benefit
- None
- Regional rail service: Bellefonte-Altoona-State College-Harrisburg-Williamsport
- Enforce existing laws
- Routes 80 and 322 connection – this needs a super creative solution to avoid screwing up the landscape
- Replace 2 lanes with 4 lanes from Seven Mountains to Route 322 Bypass
- Bus or rail to Altoona
- None needed
- Normal rail service on the scale of say, Budapest would be a good start
- Connect Route 322 at Potters Mills with I-80 but not through State College – go over Centre Hall Mountain
- Bikeshare
- Route 322 extension (4 lane) to Route 80 from Potters Mill
- None
- Nothing
- The Centre Region is very accessible and government doesn't have the money to spend on things like this.
- No more bus routes, no more terminals, no more applying for grant money for this stuff – we are deep in debt as a country and shouldn't be spending a single dime on stuff like this
- None, too costly
- More direct route to airport from I-99
- Megabus has helped area tremendously
- More daily Amtrak trains at lower fares, and cheap easy access to Lewistown station
- No more road improvements are needed
- There needs to be a roadway to bypass the village of Pine Grove Mills for those travelers heading south on Route 26

**25. Please place the following natural and environmental issues in priority order.**

**Ranked 1 (Most Important):**

- An environment in which individuals are free, and don't have government coming after their property, or coming after them for building a deck, putting in a lawn shed, and aren't taxing them endlessly because they foolishly made an improvement to their home – no more government trying to control trees, drainage ditches, or springtime puddles.
- Using actual cost analysis before stupid spending for non return eco projects
- Breathing the air of Freedom; preserving our natural rights to choose our own path; protecting our right to choose what to do on our private property; moving away from the flaky

interpretation of the PA State Constitution (right to clean air and water) that has been twisted and perverted into a reason for government and certain non-governmental organizations to seize control of what rightly belongs to individuals – control of our lives!

- Hard to choose when all are equally important
- Developers not destroying roadways and homes with unreasonable lot preparation. An example is the buildup on North Atherton Street creating excessive runoff and hence flooding with officials looking the other way
- Increased energy efficiency in all buildings and vehicles region-wide
- More Dog Parks
- Noise (truck) pollution
- Protect Spring Creek Canyon
- Protecting our area from Gas Drilling
- Reduction of Noise from area highways like I-99, I-80, and Route 322
- Renewal energy does not save the dollars

**Ranked 2:**

- Protecting the natural yearning to be free, unfettering individuals and businesses with the freedom to produce
- No opinion
- Please quit the environmental projects that have NO real return, other than only spending
- Allowing the natural ebb and flow of nature to choose their own path, instead of trying to force nature into the vision some planner or biologist has for it. A changing environment is normal, not a sign that a human has interfered.
- Don't you dare allow fracking here

**Ranked 3:**

- Fostering an environment of entrepreneurship and creativity rather than burdening those who want to produce with so much regulation that they give up and decide not to participate in the business community
- No opinion
- Increased use of renewable energy in ALL buildings
- Quit pushing eco policies with little real impact
- Expand recycling for more items; eliminate curbside collection and move to drop off centers
- Organic urban agriculture infrastructure
- Renewable energy that is not natural gas

**Ranked 4:**

- Reducing the environment of excessive intrusion by non-governmental organizations who are sucking up our tax dollars to take away our freedom
- Increased energy efficiency of ALL buildings
- Poor usage of township vehicles

- PRIVACY
- Worry that bad decisions will raise taxes badly

**Ranked 5:**

- Freedom to protect my own environment in the best way I know how rather than relying on the 'professional opinion' of someone who doesn't even know that brown trout aren't native, and that trees grow back pretty fast if you just don't mow
- no opinion
- truth in regard to environmental issues, not lies

**26. Spring Creek is classified as a high quality cold water fishery and is nationally recognized for its wild brown trout population. It is the most significant waterway that runs through the Centre Region due to its limestone spring-fed tributaries and is an important natural resource. In the past 12 months have you used Spring Creek for any of the following?**

- Family reunion, Spring Creek Park
- Love watching it
- Psychological support (ecological mindfulness group meetings)
- Walking along the creek
- Hiking and mushroom hunting along the creek and biking
- Educational field trips
- Running, hiking, walking
- Park
- Friends live nearby
- Feeding ducks
- Hiking Fisherman's Paradise Trail
- Own property on spring creek
- Birding, walking
- Picnics
- Playing in the shallow water
- Social gathering
- I participated in the Annual Watershed Clean Up Day and cleaned headwaters of Spring Creek
- Swimming
- Wading
- Viewing. Hard to believe someone managed to classify it as high quality cold water fishery even as it's posted that the waters are too polluted to eat the fish. I'm sure my tax dollars paid for both opinions. It's probably all about some social engineering goal anyway. No more programs, no more restrictions, no more hiding the creek from site with buffers, no more forcing people to provide access from their private property.
- Swimming

**29. Should municipalities offer any of the following incentives to keep existing business or attract new business?**

- Reduce code enforcement. Powers CRCE cost business 10's of millions of unneeded expenses.
- None
- Municipal subsidies for downtown real estate when used by local proprietors for low-carbon/low-consumption/local food business
- Reasonable rents
- Incentives given for businesses to use existing structures (Hills, Circuit city, etc.) before new building permits are issued
- Reduce taxes for all
- Zoning is out of control; taxes are out of control
- Perhaps promote area through ads
- Incentives to repurpose existing but vacant and underutilized commercial areas
- Ranking these should vary with the proposed project
- Depend on a case by case basis
- No need to attract new businesses – if existing aren't content they should move on
- Must be responsible and cost-effective
- Assistance to new business; help with staffing/employment; financial aid for employee benefits like health care costs
- Tax incentives to reduce fees while maintaining high development standards
- Abandon Codes
- Incentives for business facade remodeling
- Regulations are destroying our economy; taxes on businesses are too high to feasibly compete at any international level.
- Not sure how we compare to other areas
- Increased awareness of services available for aiding new and existing small businesses
- More creative approaches related to improving workforce satisfaction with community
- Suggest new businesses; recycle old vacant buildings instead of demolishing & building a new
- Graduated tax abatement based on impact minimization. Businesses willing to re-use existing space, and do it with low impact/renewable, etc., should be encouraged, whereas building yet another strip mall/big box/office park should be strongly discouraged.
- Public-private partnerships that encourage sustainable businesses including revolving loan funds
- Free desert
- Attraction for facilities already in place, rather than building new
- I'm not sure
- Municipalities and COG should reduce the regulatory burden, reduce the requirements for parking, landscaping, facility size (things that businesses are best suited to determine), and end the practice of deciding what businesses are acceptable – let the market decide. Bad business choices should result in failure of the business, not in a negotiating session with planners.

- Tax dollars should not be used to encourage OR discourage businesses from locating here; businesses should do their own research, fund their own costs, and pay their own taxes
- Eliminate code enforcement, zoning, and regulations – these kill the economy
- The main incentive should be what the area as a whole can provide without the need for taxpayer subsidized (i.e. KOZ type) incentives.
- Funding comprehensive Wi-Fi coverage of the Centre Region
- Communicate the benefits of our highly educated community

**30. How important is it to offer the following economic development strategies in the Centre Region?**

**Ranked 1 (Most Important):**

- Utilize existing vacant commercial space for business
- Nightlife activities for non-student adults
- Create a vision of a better quality of life in the community that integrates ALL of the above
- Improve the quality of life to attract/retain knowledgeable workers (see recent Knight Foundation report)
- Government should not be in the business of picking winners and losers, not the elected officials and not the paid staff
- Local government strategy should be limited to keeping the peace and maintaining the roads
- More Dog Parks

**Ranked 2:**

- Attract better doctors and health professionals
- Support neighborhood-scale renewable energy infrastructure
- Inform citizens as to the insolvent and detrimental problem of healthcare and social security; most young people that will be affected by it don't know anything about it. The majority of people fighting to keep it are seniors, not the generation that will suffer.
- Reduce the tax burden – stop spending money on programs like those listed above.
- After maintaining the peace and the roads, let individual groups get together and provide special things they want like forests to play in, Frisbee golf, etc. If there are enough people who want those things, they'll be able to raise the money privately without taxing all of us for it.

**Ranked 3:**

- Auto racing facilities
- Support proprietors of skilled crafts-based businesses
- All 6 above are unimportant
- Again, keep an eye open for economic development that makes sense in an increasingly energy and natural resource constrained marketplace; more small trades/crafts/goods on small scales
- No more grants or special treatment for any of the listed items, as most of them turn out to be scams benefitting some individual or group rather than all of us anyway

**Ranked 4:**

- All 6 above are unimportant
- Promote the widening of Rte. 322 E from Boalsburg to Seven Mountains

**Ranked 5 (Least Important):**

- Financial support to community-supported organizations like Interfaith mission, United Way, and legal services
- All 6 above are unimportant
- Less football, more science. Football is seasonal money.
- Provide educational/training to develop workforce
- Think about NOT choking businesses to death

**36. Which category best describes your occupation?**

- Researcher
- Communication
- EMS
- Retired
- Government
- Operations
- Weis Store
- Research Assistant/Student
- Post. Researcher
- Veterinary Medical
- Farmer
- Technology
- Industry Consultant
- Financial Planner
- Medical
- Graduate Student
- Graduate Student
- Clergy
- Paraprofessional
- Graduate Student
- Doctoral Student
- Graduate Student
- Research Assistant
- Child Caregiver
- Research Assistant
- Retail Supervisor
- Accounting

- Financial Services
- Musician
- Graphic Design/Staff Assistant
- Freelance Writer
- Contractor

### **Miscellaneous Comments**

- Question 2 – But not Penn State students. Already too many students ruining downtown shopping and parking.
- Disapprove of many of the townhome regulations – No way to enforce the rules.
- Please take a look at Ashville, NC – they're doing some things right there. Seems like the Centre Region could do similar things. Thanks.
- Question 23 – It's insane that there is no train service in State College. It should be a major stop.
- Question 29 – It's case by case. The first three can be effective or inefficient.
- State College is looking run down and poor. With so many trees taken out, it is stark, hot, and barren and it lacks character – just bars and cheap shops with no charm or warmth.
- Thank you for the opportunity for input
- There is a problem I see that should be addressed: Businesses should maintain their frontage; shrubbery, parking areas (weeds). Martin Street area is guilty.
- These are hard questions and it takes a lot longer than 20 minutes
- This survey was very non-specific and needlessly confusing. It was also irrelevant and at some points the questions felt leading. The real survey question would be "How do I feel the CRPA is connecting with my needs?" and just leave it blank. Seriously.

## APPENDIX A

# RANDOM SAMPLE SURVEY QUESTIONNAIRE AND RESULTS

### BACKGROUND

The CRPA sent the random sample survey to 2,000 randomly selected addresses in the six municipalities in the Centre Region in the summer of 2011. The results of the random sample survey are the basis for the analysis in this report and the opinions that form some of the policies in the Comprehensive Plan. The purpose of the random sample survey results are:

- To collect resident attitudes and opinions
- To obtain statistically valid results
- To understand key issues and topics
- To be cost effective method to obtain feedback

### READING THE RESULTS

The results for all responses are included in the column labeled “Random Sample”. This column is the sum of all municipal results and is the data used in the analysis for this report. Results for individual municipalities are included in the columns to the right of the “Random Sample” column.

- Statistically Significant Response Rates: The consultant performed cross tabulations by municipality to determine if there was a statistically significant difference in response rates by municipality for individual questions. For example, for question 1 on page 3, the response “Improving personal security and public safety” was statistically higher in College, Ferguson, Harris and Patton Townships than it was in Halfmoon Township. The response in State College Borough was statistically higher than the response rate in Halfmoon and Ferguson Townships. The “upper case letters” below the response rate refer to the individual municipalities and are associated with the response immediately above the “upper case letters.” All results indicate significant at the 95% level, meaning if the same question were asked of all members of the municipality, 95% would answer the same. See the example on page 3.
- Questions that require a variety of choices be ranked (most important, second most important, third most important, etc.): There are a number of questions in the survey that require a respondent to rank a variety of choices, most important, second most important, third most important, etc. Question 25 on page 50 is an example of this type of question. These questions may be reported two ways. The first way of reporting the question indicates the percentage of respondents selecting the choices as most important, second most important, third most important, etc. When the **columns** are totaled vertically, they will add to 100%. For example, on question 25 on page 50, 7% of respondents ranked “air quality” as the most important issue, while 3.4% ranked “refuse management and recycling programs” as the most important issue.

Another way of reporting these questions is to sum the percentage of respondents ranking an issue in the top five. For example, 92% of all respondents rank “protect drinking water quality” in the top five environmental issues from all potential choices. This reporting is completed by summing the percentage of respondents who ranked the issue as most important (41.1%), plus second most important (19.6%), plus third most important (15.0%), plus fourth most important (8.8%), plus fifth most important (7.2%), the sum of which equals 92%.

We would like to know what your opinion is regarding each item presented below. Please read each item and decide how you feel about it. The survey is fairly comprehensive, covering many topics related to life in the Centre Region, particularly those which relate to the comprehensive planning process. These include:

- Land use and development
- Transportation
- Housing
- The environment
- The economy
- Communication between residents and government

This survey will take approximately 20 minutes to complete. It is being conducted for residents living in the Centre Region, which includes College, Ferguson, Halfmoon, Harris and Patton Townships and the Borough of State College. The boundary of the Centre Region is also the same as the State College Area School District (SCASD).

### **Attitudes about Land Use and Development in the Centre Region**

1. The following is a list of objectives which could be used to guide future growth and development in the **Centre Region**. Please read the list of ten items and decide which are most important and least important to you. Place the letter **M** next to the three objectives that are most important to you. Place the letter **L** next to the three objectives that are least important to you.

- \_\_\_\_\_ Maintaining a low level of environmental pollution
- \_\_\_\_\_ Having access to open space (parks, green belts, wooded land) near residential areas
- \_\_\_\_\_ Expanding the variety and availability of retail goods and services
- \_\_\_\_\_ Improving personal security and public safety
- \_\_\_\_\_ Attracting business
- \_\_\_\_\_ Maintaining and enhancing the visual appearance of buildings and landscaping
- \_\_\_\_\_ Increasing education opportunities for all age groups
- \_\_\_\_\_ Protecting neighborhoods from encroachment by non-residential land uses
- \_\_\_\_\_ Building and maintaining livable neighborhoods
- \_\_\_\_\_ Encouraging a sustainable region
- \_\_\_\_\_ Other (Please specify) \_\_\_\_\_

2. The current population of the **Centre Region** is approximately 92,000 persons. During the next 30 years what rate of population growth would you prefer for the **Centre Region**? Please check the population number which corresponds to your preference. (Check only one.)

- High rate of population growth (An additional 32,000 residents)
- Moderate rate of population growth (An additional 18,000 residents)
- Low rate of population growth (An additional 6,000 residents)
- No increase in population
- It doesn't matter to me.

3. Nine broad goals have been used to guide regional growth and development in the **Centre Region** since 2000. Please fill in the circle that best corresponds to your current opinion regarding each of the goals.

| REVALIDATION OF 2000 CENTRE REGION COMPREHENSIVE PLAN GOALS  |                       |                       |                       |
|--|-----------------------|-----------------------|-----------------------|
| Comprehensive Plan Goal  | Is the goal...?       |                       |                       |
|  | Still Relevant        | No Longer Relevant    | Don't Know/ Not Sure  |
| Balance community growth while protecting and enhancing the <b>Centre Region's</b> environmental, historic, and cultural resources.  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Direct the majority of future growth to areas within the Regional Growth Boundary so that new development can be efficiently served by public utilities, services, and transit.      | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Preserve and enhance the low-density community character in the rural areas located outside of the Regional Growth Boundary.   | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Preserve prime farmland for agricultural use.  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Coordinate land development activity with the transportation system for the safe, efficient, and convenient movement of people and goods.  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Coordinate land development activity with necessary public facilities and services in a cost-effective manner.   | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Obtain additional parkland and open-space areas, and provide a broad range of recreational opportunities.  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Provide a variety of housing opportunities to satisfy the needs of all existing and future residents of the <b>Centre Region</b> .   | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Maintain a cooperative relationship between the <b>Centre Region</b> municipalities and Penn State University to ensure that future growth at the University benefits the community. | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

4. To what extent do you agree or disagree with the following statements?

|  | Strongly Agree        | Agree                 | Uncertain/ Undecided  | Disagree              | Strongly Disagree     |
|--|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| The <b>Centre Region</b> should have an overall plan that directs future growth and development to appropriate locations.  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| I would like <b>municipal</b> officials to have a stronger role in controlling new development in the area.  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Individuals and developers should be free to develop land without a lot of controls and restrictions by <b>municipalities</b> .                                  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| The economic needs of the area should be the driving force that determines what type of development takes place in the <b>Centre Region</b> .                    | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| <b>Municipalities</b> should use local tax resources to protect historic landmarks and buildings.  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| <b>Municipalities</b> should protect historic landmarks and buildings through regulations and law.   | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| <b>Municipalities</b> should use local tax resources to preserve natural resources (air, water, soil, forests, etc.).  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| <b>Municipalities</b> should use regulations, such as zoning or private conservation easements, to preserve natural resources (air, water, soil, forests, etc.). | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| <b>Municipalities</b> should use local tax resources to preserve farming.  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| <b>Municipalities</b> should use regulations, such as zoning or private conservation easements, to preserve farming.   | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

5. Please place the following land use issues in the **Centre Region** in priority order. (1 being the highest priority and 5 being the lowest priority.)

- \_\_\_\_\_ Preservation of farming  
 \_\_\_\_\_ Preservation of natural resources (air, water, soil, forests, etc.)  
 \_\_\_\_\_ Diversify businesses in downtown State College  
 \_\_\_\_\_ Redevelopment of older shopping centers  
 \_\_\_\_\_ Preservation of established neighborhoods

6. Do you feel the **Centre Region** needs more of the following types of land uses? (Check all that apply.)

- Neighborhood based convenience uses (dry cleaner, tax service, barber shop, drug store)  
 Grocery store or shopping center  
 Regional shopping mall  
 Specialty stores and boutiques  
 No additional commercial uses needed  
 Industrial areas  
 Mixed use areas (i.e. residential, commercial, office)  
 Other (please specify) \_\_\_\_\_

7. Do you feel your **neighborhood** needs more of the following types of land uses? (Check all that apply.)

- Neighborhood based convenience uses (dry cleaner, tax service, barber shop, drug store)  
 Grocery store or shopping center  
 Regional shopping mall  
 Specialty stores and boutiques  
 No additional commercial uses needed  
 Industrial areas  
 Mixed use areas (i.e. residential, commercial, office)  
 Other (please specify) \_\_\_\_\_

### **Attitudes about Housing in the Centre Region**

8. How important is it to provide more of the following housing characteristics in the **Centre Region**? (Please place the following housing characteristics in priority order, with 1 being the most important characteristic to increase and 5 being the least important characteristic to increase.)

- \_\_\_\_\_ Affordable rental or for-sale housing  
 \_\_\_\_\_ Owner-occupied housing  
 \_\_\_\_\_ Housing located within walking distance of work, shopping, or bus service  
 \_\_\_\_\_ Housing that is clustered together to preserve farms and natural areas  
 \_\_\_\_\_ Better mix of housing types (single-family detached, townhouse, duplex, apartment)  
 \_\_\_\_\_ Other (please specify) \_\_\_\_\_

9. How important is it to increase each of the following housing types in the **Centre Region**? ( Please place the following housing types in priority order, with 1 being the most important type to increase and 5 being the least important type to increase.)

- |   |                            |
|---|----------------------------|
| _____ Single-family detached homes      | _____ Townhouses           |
| _____ Apartments in single-family homes | _____ Mobile Homes         |
| _____ Apartment buildings/complexes     | _____ Senior housing (55+) |
| _____ Duplexes                          |                            |

14. What public services, not listed in Question 13, do you want? (Please list no more than 3.)

- 1) \_\_\_\_\_
- 2) \_\_\_\_\_
- 3) \_\_\_\_\_

**Attitudes about Transportation**

15. In a typical week (Monday-Friday) what is the primary purpose of your travel? (Check only one.)

- Work
- Shopping
- Medical Appointment
- School
- Recreation
- Other (Please specify) \_\_\_\_\_

16. What is the main mode of travel for your primary trip? (Check only one.)

- Automobile/truck/minivan/etc.
- Bicycle
- Taxi
- Carpool/vanpool
- Walk
- Public transportation
- Motorcycle/scooter

17. How frequently do you use public transportation?

- Daily
- Occasionally (several times a month)
- Never
- Frequently (several times a week)
- Rarely (few times a year)

18. If you use public transportation, which do you use the most? (Check only one.)

- CATABus
- Centre County Office of Transportation Services van/bus
- Campus Loop/Link
- Other (Please specify) \_\_\_\_\_
- CATARide

19. Which of the following factors would encourage you to use public transportation more? (Please rank in priority order the top five, with 1 being the highest priority and 5 being the lowest priority.)

- |   |  |
|---|--|
| ____ Reduce cost of bus fare or bus pass                | ____ Expanded hours of operation                           |
| ____ Increase in frequency of departures from bus stops | ____ More direct bus route between my home and destination |
| ____ Service to my neighborhood                         | ____ A bus stop closer to my destination                   |
| ____ A bus stop closer to my home                       | ____ Other (Please specify) _____                          |

20. Of the following corridors, which are you most concerned with in terms of safety? (Check no more than 3.)

- |   |                                   |
|---|-----------------------------------|
| ____ College and Beaver Avenues in Downtown State College | ____ University Drive             |
| ____ East College Avenue                                  | ____ Whitehall Road               |
| ____ West College Avenue                                  | ____ Park Avenue                  |
| ____ North Atherton Street                                | ____ Vairo Boulevard/Waddle Road  |
| ____ South Atherton Street                                | ____ None                         |
| ____ Valley Vista Drive/Science Park Road                 | ____ Other (Please specify) _____ |

21. What roadway improvements should be made in the **Centre Region**? (Check no more than 3.)

- Focus on maintaining good pavement quality and bridge conditions
- Make existing traffic signals more efficient (could be several traffic signals along a corridor, or an individual traffic signal)
- Add more traffic signals
- Widen existing roads in other congested areas (includes travel lanes and/or dedicated turning lanes)
- Add sidewalks and bike lanes along roadways
- Add street lighting in highway interchange areas
- Add street lighting in major roadway corridors
- Implement traffic calming measures (speed tables, narrowing streets, curb bulb-outs at intersections, or an individual traffic signal)
- Other (Please specify) \_\_\_\_\_

22. What improvements in bicycle or pedestrian facilities should be made in the **Centre Region**? (Check no more than 3.)

- |   |   |
|---|---|
| <input type="checkbox"/> Add more off-street bikeways and trails                              | <input type="checkbox"/> Make crosswalks more visible   |
| <input type="checkbox"/> Add more bike lanes on roads   | <input type="checkbox"/> Add more facilities that reduce conflicts between pedestrians and vehicles (mid-block crosswalks, signing, lighting, etc.) |
| <input type="checkbox"/> Provide connections between existing sidewalks, trails, and bikeways | <input type="checkbox"/> Other (Please specify) _____   |
| <input type="checkbox"/> Expand the system of sidewalks and pedestrian trails                 |   |

23. What improvements should be made to enhance transportation access to the **Centre Region**? (Check no more than 3.)

- |   |  |
|---|--|
| <input type="checkbox"/> More passenger air service at the University Park Airport          | <input type="checkbox"/> New interchange between Interstate 99 and Interstate 80 at the Exit 161 Bellefonte Interchange                            |
| <input type="checkbox"/> A new <b>Centre Region</b> Bus Terminal                            | <input type="checkbox"/> Major highway improvements to connect the <b>Centre Region</b> with the four lane Section of Route 322 at Seven Mountains |
| <input type="checkbox"/> More intercity bus service   | <input type="checkbox"/> Other (Please specify) _____  |
| <input type="checkbox"/> High speed rail service  |  |
| <input type="checkbox"/> Roadway access to Interstate 80 via Route 322 West of Port Matilda |  |

24. Do you spend more than 15% of your household income on transportation costs? (Costs include monthly vehicle loan payments, insurance, vehicle registration, vehicle maintenance and repairs; bus fare, bus pass, taxi fare, etc.)

- Yes                       No                       Don't know

**Attitudes regarding the Environment in the Centre Region**

25. Please place the following natural and environmental issues in priority order. (1 being the highest priority and 5 being the lowest priority.)

- Quality and quantity of water resources (which include but are not limited to, streams, rivers, wetlands)
- Open space
- Air quality
- Access to forest, game lands, and natural areas
- Refuse management and recycling programs
- Use of renewable energy sources in municipal buildings and vehicles
- Increase energy efficiency in municipal buildings and vehicles
- Protect drinking water quality
- Other (Please specify) \_\_\_\_\_

26. **Spring Creek** is classified as a high quality cold water fishery and is nationally recognized for its wild brown trout population. It is the most significant waterway that runs through the **Centre Region** due to its limestone spring-fed tributaries and is an important natural resource. In the past 12 months, have you used **Spring Creek** for any of the following activities? (Please check all that apply.)

- Fishing
- Canoe, Kayak
- General Passive Recreation
- I have not used Spring Creek
- Other (Please specify) \_\_\_\_\_

27. Which of the following items do you feel the **municipalities** should engage in to protect or improve the quality of Spring Creek and its tributaries? (Please check all that you think are important.)

- Restrict development near Spring Creek and its tributaries
- Educate the public about specific issues related to Spring Creek and its tributaries
- Increase vegetative buffers near Spring Creek and its tributaries
- Increase access to Spring Creek and its tributaries

**Attitudes regarding the Centre Region Economy**

28. Please place the following economic issues in priority order. (1 being the highest priority and 3 being the lowest priority.)

- Retaining existing businesses in the **Centre Region**
- Expanding existing businesses in the **Centre Region**
- Attracting new businesses to the **Centre Region**

29. Should **municipalities** offer any of the following incentives to keep existing businesses or attract new businesses? (Check all that you feel should be used.)

- Tax abatements or reductions
- Reducing development review and permitting fees
- Funding construction of infrastructure such as streets, water or sewer lines
- Incentives should not be offered
- Other (Please specify) \_\_\_\_\_

30. How important is it to offer the following economic development strategies in the **Centre Region**? ( Please rank the following strategies, with 1 being the highest priority and 5 being the lowest priority. If you believe economic development strategies are *not* needed check the *first* item.)

- No specific economic development strategies are needed
- Support natural and cultural resource-based tourism (hiking, biking, birding, arts)
- Support recreational-based activities and tourism (sports)
- Support local food, direct-farm marketing, "Buy Fresh Buy Local"
- Attract more high-tech jobs
- Attract more manufacturing jobs
- Attract more research office opportunities
- Continue to ensure infrastructure is built and maintained to serve existing businesses
- Attract more retail and service jobs
- Other (Please specify) \_\_\_\_\_

### **Attitudes about Local Government and Resident Communication**

31. Choose the 3 ways you would prefer to receive information regarding community meetings, community issues, or community events. (Please check only 3.)

- View **municipal** web page
- View **Centre Region** web page
- Inserts in utility bills, refuse bills or US Mail
- Read it in the Centre Daily Times
- Read it in The Daily Collegian
- Email
- Social media (Facebook, Twitter, blogs)
- Township Newsletter

**Demographic Information**

32. Please check the **municipality** where you currently live.

- College Township       Ferguson Township       Halfmoon Township  
 Harris Township       Patton Township       Borough of State College

33. Please check the total number of years you have lived in any of the six municipalities in the previous question.

- 1 year or less       6 to 10 years       16 to 20 years  
 2 to 5 years       11 to 15 years       Over 20 years

34. Are you employed? (If No, skip to question 37.)

- Yes       No

35. If you are employed, please check the municipality in which your job is located.

- Bellefonte Borough     Halfmoon Township     State College Borough  
 Benner Township       Harris Township       Another municipality in Centre County  
 College Township       Patton Township       Another municipality outside Centre County  
 Ferguson Township     Spring Township

36. Which category best describes your occupation?

- Educator       Manager or business owner       Skilled worker  
 Professional     Salesperson       Other (Please specify) \_\_\_\_\_  
 Clerical worker     Service worker

37. Is anyone in your household a full-time or part-time student at Penn State University's – University Park Campus?

- Yes       No

38. Please check the box that most closely describes the type of housing unit you live in. (Please check only 1.)

- A detached single family home       A duplex  
 An apartment in an apartment complex       Townhouse  
 An apartment in a single family home       A mobile home  
 Group quarters (dorm, sorority/  
fraternity house, nursing home)       Other

39. Do you rent or own your residence?

Rent

Own

40. About how much was the gross income for your household in 2010? (Include all persons in the household for which a tax return was filed.)

Less than \$10,000

\$35,000 to \$49,999

\$150,000 to \$199,999

\$10,000 to \$14,999

\$50,000 to \$74,999

\$200,000 or more

\$15,000 to \$24,999

\$75,000 to \$99,999

\$25,000 to \$34,999

\$100,000 to \$149,999

41. My age group is

18 - 24

35 - 44

60 - 64

25 - 34

45 - 59

65 +

42. What is the highest level of education you have completed?

0-11 years, no diploma

Associate Degree

Master's Degree

High school graduate

Bachelor's Degree

Doctorate Degree

Some college, no degree

43. What is your gender?

Male

Female

## **APPENDIX B**

### **DROP-IN SAMPLE SURVEY RESULTS**

#### **BACKGROUND**

The “drop-in” sample survey refers to an open access survey posted on the CRPA webpage that was available during the duration of the sampling period. This report does not use the drop-in survey sample in the final analysis of survey results. The drop-in survey did, however, accomplish several objectives:

- The drop-in survey broadened public participation by allowing any resident in the Centre Region with access to a computer to participate in the survey process. A total of 150 individuals completed the drop-in survey.
- The drop-in survey allowed the consultant to aggregate the results of the random sample and drop-in sample results into a combined summary (see Appendix C). The combined survey results and random sample survey results produced similar responses on nearly every question in the survey.

#### **READING THE RESULTS**

See APPENDIX A for instructions on reading the results.

2011 Centre Region Community Survey Results - Drop-Ins

Random sample weighted by relative municipality population

## **APPENDIX C**

### **RANDOM SAMPLE AND DROP-IN SAMPLE COMBINED RESULTS**

#### **BACKGROUND**

The random sample survey and “drop-in” sample survey results were combined in this appendix. By aggregating the results, the consultant was able to compare responses for each question in the combined results with those in the random sample results (at the regional level). The combined results show that the random sample results, when compared to the combined results, were nearly identical. The combined survey results and random sample survey results produced similar responses on nearly every question in the survey.

#### **READING THE RESULTS**

See APPENDIX A for instructions on reading the results.

## APPENDIX D

### WEIGHTED RANDOM SAMPLE RESULTS

#### BACKGROUND

The consultant weighted the random sample in this Appendix to compensate for a low return rate from the Borough of State College in an effort to compare with the random sample (unweighted) results. The Borough was not oversampled to compensate for the number of students living in the Borough; therefore, the percentage of surveys returned was much lower than for other municipalities. The weighted results did not have statistically significant differences with the random sample. After this test, and in consultation with IntelliQ, the CPRA elected to use the results of the unweighted random sample to analyze the results.

#### READING THE RESULTS

The results for all responses are included in the column labeled “Random Sample.” This column is the sum of all municipal results and is the data used in the analysis for this report. Results for individual municipalities are labeled and displayed in the columns to the right of the “Random Sample” column.

- Statistically Significant Response Rates: The consultant performed cross tabulations by municipality to determine if there was a statistically significant difference in response rates by municipality for individual questions. For example, for question 1 on page 3, the response “Improving personal security and public safety” was statistically higher in College, Ferguson, Harris and Patton Townships than it was in Halfmoon Township. The response in State College Borough was statistically higher than the response rate in Halfmoon and Ferguson Townships. The “upper case letters” below the response rate refer to the individual municipalities and are associated with the response immediately above the “upper case letters.” All results indicate significant at the 95% level, meaning if the same question were asked of all members of the municipality, 95% would answer the same. See the example on page 3.
- Questions that require a variety of choices be ranked (most important, second most important, third most important, etc): There are a number of questions in the survey that require a respondent to rank a variety of choices, most important, second most important, third most important, etc. Question 25 on page 50 is an example of this type of question. These questions may be reported two ways. The first way of reporting the question indicates the percentage of respondents selecting the choices as most important, second most important, third most important, etc. When the **columns** are totaled vertically, they will add to 100%. For example, for question 25 on page 50, 7.1% of respondents ranked “air quality” as the most important issue, while 3.7% ranked “refuse management and recycling programs” as the most important issue.

Another way of reporting these questions is to sum the percentage of respondents ranking an issue in the top five. For example, 91% of all respondents rank “protect drinking water quality” in the top five environmental issues from all potential choices. This reporting is completed by summing the percentage of respondents who ranked the issue as most important (41.1%), plus second most important (21.2%), plus third most important (14.1%), plus fourth most important (7.5%), plus fifth most important (6.8%), the sum of which equals 92%.

4. To what extent do you agree or disagree with the following statement?

Municipalities should use regulations, such as zoning or private conservation easements, to preserve farming.

Random sample weighted by relative municipality population

## **APPENDIX E**

### **SURVEY METHODOLOGY**

#### **SURVEY INSTRUMENT DEVELOPMENT**

Preparation of the survey instrument started with questions from a survey used in 1986. In addition, CRPA staff developed new questions based upon work completed to date in the comprehensive planning process and in consultation with planning staff from Ferguson Township, the Borough of State College and IntelliQ. A ten-page, 43-question draft survey emerged through this iterative process. The COG Transportation and Land Use (TLU) Committee, the Centre Regional Planning Commission (CRPC), CRPA staff, Ferguson Township staff and State College Borough staff, and IntelliQ Research and Strategy completed reviews at least once during the process. The COG TLU Committee and CRPC approved final questions during a joint meeting on June 2, 2011. IntelliQ and CRPA staff completed final survey design of the paper and online survey instruments after the approval of questions by the TLU Committee and CRPC.

#### **SURVEY SAMPLE SELECTION**

All addresses in the six Centre Region municipalities comprised the universe of addresses eligible to receive the random sample survey. The universe of addresses included data from the Centre Region Code Administration Agency and the Centre County Planning and Community Development Office. Student housing on the Penn State University Campus was not eligible to receive the random sample survey. Large apartment complexes known to include student housing were also not included.

The CRPA used systematic sampling of addresses to choose addresses within the six Centre Region municipalities to receive the random sample survey. Systematic sampling is a procedure that selects every “N<sup>th</sup>” item from a complete list of all possible items, so that the appropriate number of items is selected. The CRPA created a larger list than needed in order to provide additional randomly selected addresses in each municipality if needed. The number of randomly selected addresses from each municipality is based upon the proportion of Centre Region addresses in each municipality.

#### **SURVEY ADMINISTRATION AND SURVEY RESPONSE**

The CRPA contacted each random sample address four times during the survey administration. First, a pre-notification postcard was sent, informing the residents at the address that they had been selected to participate in the survey. Recipients received the survey and a cover letter requesting participation and instructions for completing the survey about one week after pre-notification. The mailing contained a postage-paid return envelope, which survey recipients could use to mail the completed questionnaire directly to IntelliQ. The letter also included instructions and a unique code to complete the survey online. The CRPA sent two follow up letters to all recipients. The letter thanked those that had completed the survey and was a reminder for recipients to complete the survey if they had not done so.

A total of 461 persons responded to the random sample survey of 2,005, resulting in a response rate of 23%. Another 150 individuals completed the “drop-in” survey. The response rate is about 30% when the random sample and “drop-in” surveys are combined. Initially, there were 2,020 addresses for the survey mailing. Six of the initial addresses were discarded due to problems with the address. A total of 18 pre-notification postcards were returned as “undeliverable,” and nine of these addresses were eventually removed from the mailing list. A total of three surveys were returned as “undeliverable,” resulting in a total of 2,002 surveys eventually making it to individual mailboxes in the region.

### **95 PERCENT CONFIDENCE INTERVALS**

The 95 percent confidence interval (or “margin of error”) quantifies the “sampling error” or precision of the estimates made from the survey results. A 95 percent confidence interval can be calculated for any sample size, and indicates that in 95 of 100 surveys conducted like this one, for a particular item, a result would be found that is within  $\pm 3$  percentage points of the result that would be found if everyone in the population of interest was surveyed. Other types of “error” such as nonresponse error may also influence or bias results (i.e. those who did not respond to the survey may have felt differently about the issues covered than those who did respond).

### **DATA ENTRY, DATA WEIGHTING, AND DATA ANALYSIS**

Data entry, data weighting, and data analysis was conducted by IntelliQ under contract with the Centre Region Council of Governments. Appendix D contains the weighted random sample results for the survey. The weighted sample was used to test the validity of the random sample. There were not statistically significant differences between the results, and in the end, the CRPA used the unweighted random sample for analysis in this document.

### **RESPONDENT CHARACTERISTICS**

The CRPA sent surveys to 2,002 random addresses in the region. It primarily asked for resident opinions regarding long-term land use, transportation, environmental and housing questions. The intent was to understand opinions from full-time, year-round residents of the Centre Region.

The CRPA compared demographic characteristics of the survey sample, where possible, to those demographic characteristics found in the 2010 US Census estimates in the region. The consultant did not adjust (i.e. weight) demographic characteristics to reflect the larger population in the region. There are differences between the random sample demographics and the 2010 US Census estimates. The differences are largely attributed to the number of students living in the region. For example, the student population artificially reduces the median age, median income, and homeownership estimates found in the US Census.

The following differences between demographic characteristics of the random sample and the 2010 US Census estimates are noted:

- The random sample is older.
- The random sample is wealthier.
- There are more homeowners in the random sample.
- There are more single-family homeowners in the random sample.
- The random sample had longer-term residents.
- The random sample had a slightly higher level of education.

**A total of 461 responses to the random sample survey = 23% Response Rate**

Location of residence, length of residence, home ownership and type of residence

**Where do you live?**

**How long have you lived in a Centre Region municipality?**

**Do you rent or own your residence?**

Location of work, employment status and employment classification

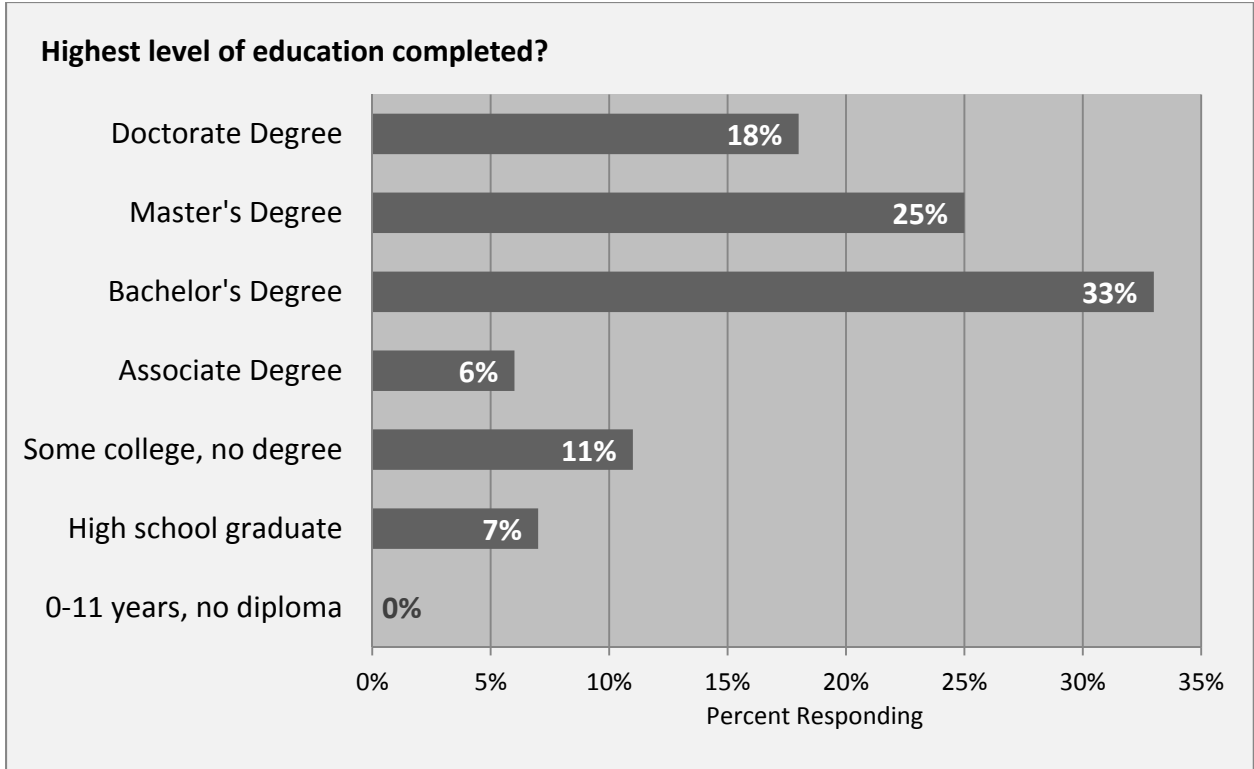

\* Write-in responses to “Other” can be found on page 67.

Respondent age group, income level, education level and gender

## APPENDIX F

### 1986 SURVEY QUESTIONNAIRE AND RESULTS

The last survey to measure resident opinion regarding region-wide land use issues was completed in 1986. Several questions from the 1986 survey were included in 2011 to measure any significant changes in the intervening 25 years. The results are summarized below and discussed in more detail following the table.

| 1986 and 2011 Survey Questions  |                          |                         |                                |                          |                         |                                |
|---|--------------------------|-------------------------|--------------------------------|--------------------------|-------------------------|--------------------------------|
|   | 1986                     |                         |                                | 2011                     |                         |                                |
|   | Strongly Agree/<br>Agree | Uncertain/<br>Undecided | Strongly Disagree/<br>Disagree | Strongly Agree/<br>Agree | Uncertain/<br>Undecided | Strongly Disagree/<br>Disagree |
| The Centre Region should have an overall plan which identifies where different types of development would be permitted. <sup>1</sup>            | 87%                      | 7%                      | 6%                             | 90%                      | 6%                      | 4%                             |
|   |                          |                         |                                | +3%                      | -1%                     | -2%                            |
| I would like local government officials to have a stronger role in controlling new development in the area.                                     | 54%                      | 27%                     | 18%                            | 46%                      | 35%                     | 19%                            |
|   |                          |                         |                                | -8%                      | +8%                     | +1%                            |
| Individuals and developers should be free to develop land without a lot of controls and restrictions by local government. <sup>2</sup>          | 13%                      | 7%                      | 79%                            | 15%                      | 8%                      | 77%                            |
|   |                          |                         |                                | +2%                      | +1%                     | -1%                            |
| Local government should protect historic landmarks and buildings through regulations and law. <sup>3</sup>                                      | 75%                      | 15%                     | 10%                            | 68%                      | 18%                     | 14%                            |
|   |                          |                         |                                | -7%                      | +3%                     | +4%                            |
| Local government should use local tax resources to restore and preserve historic landmarks and buildings. <sup>4</sup>                          | 78%                      | 14%                     | 9%                             | 47%                      | 28%                     | 25%                            |

Source: Centre Regional Planning Agency, November 2011

Notes:

- (1) Changed in 2011 to "The Centre Region should have an overall plan that directs future growth and development to appropriate locations."
- (2) Changed in 2011 to "Individuals and developers should be free to develop land without a lot of controls and restrictions by municipalities."
- (3) Changed in 2011 to "Municipalities should protect historic landmarks and buildings through regulations and law."
- (4) Changed in 2011 to "Municipalities should use local tax resources to protect historic landmarks and buildings."
- (5) Changed in 2011 to "The economic needs of the area should be the driving force that determines what type of development takes place in the Centre Region."
- (6) Changed in 2011 to "Do you feel there are enough homes available for purchase in your price range in the Centre Region?"
- (7) Changed in 2011 to "Do you feel there is enough rental housing available in your price range in the Centre Region?"

### **CHANGES TO RESIDENT OPINIONS – 1986 TO 2011**

The survey results indicate several areas where resident opinion has changed over the past 25 years:

1. In 1986, 54 percent of respondents strongly agreed or agreed that they would like “local government officials to have a stronger role in controlling new development in the area.” By 2011, 46 percent of respondents strongly agreed or agreed that with this statement.
2. By 2011, the percentage of respondents who strongly agreed or agreed that “local government should protect historic landmarks and buildings through regulations and law” dropped from 75 percent to 68 percent.
3. By 2011 the percentage of respondents who strongly agreed or agreed that “local government should use local tax resources to restore and preserve historic landmarks and buildings” had declined from 78 percent to 47 percent. The percentage of respondents who strongly disagreed or disagreed with this statement increased from 9 percent to 25 percent.
4. The percentage of respondents who strongly agreed or agreed with the statement “the economic needs of the area should be the main thing that determines what type of development takes place in the Centre Region” increased from 39 percent to 47 percent.
5. In 1986, 35 percent of respondents strongly agreed or agreed with the statement that “there are not enough homes available for purchase in my price range.” In 2011, 46 percent of respondents said “yes” when asked “do you feel there are enough homes available for purchase in your price range in the Centre Region.”

## **APPENDIX G**

### **COMMUNICATION AND NOTIFICATION**

The CRPA employed an extensive publicity and notification methodology to solicit public participation in the survey.

#### **CENTRE DAILY TIMES INSERT**

- This consisted of a color 8 ½ x 11 full color insert in the Centre Daily Times. The distribution included all subscribers to the newspaper.

#### **PRE-NOTIFICATION POSTCARD**

- Pre-notification postcards were sent to the 2,000 randomly selected addresses about two weeks prior to receiving the survey.

#### **FIRST REMINDER LETTER**

- A reminder letter was sent to all 2,000 randomly selected addresses about two weeks after they had received the survey.

#### **CENTRE DAILY TIMES ARTICLE**

- An article was placed in Centre Daily Times opinion page about halfway through the survey process.

#### **SECOND REMINDER LETTER**

- A second reminder letter was sent to all 2,000 randomly selected addresses about two weeks prior to the survey deadline.

#### **PROJECT SCHEDULE**

- A project schedule was reviewed monthly at the Centre Regional Planning Commission (CRPC) and COG Transportation and Land Use (TLU) Committee meetings throughout the survey process.

#### **PUBLIC MEETINGS**

- Regular announcements were made at COG meetings, CRPC meetings, and municipal meetings attended by CRPA staff.

#### **WEBPAGE POSTINGS**

- The drop-in survey was posted on the COG webpage throughout the survey period, and several municipalities posted reminders for residents on municipal web pages.

CENTRE DAILY TIMES INSERT

# ***Envision Centre Region Community Survey***

## ***WE WANT YOUR INPUT***

The survey is designed to identify the issues which are most important to Centre Region residents and the community. The information gathered will guide the Centre Regional Planning Agency and local officials in the decision-making process when planning for the future.

---

*This survey is a chance for you to help shape your community.  
Your input is essential!*

**Surveys will be mailed to randomly selected residents of  
College, Ferguson, Harris, Halfmoon and Patton Townships  
and the Borough of State College during the week of  
July 5th 2011.**

***Envision Centre Region***

A community survey for the Centre Region Comprehensive Plan

[www.envisioncentreregion.org](http://www.envisioncentreregion.org) [www.crcog.net/planning](http://www.crcog.net/planning)

**Dear Resident,**

You have been randomly selected to participate in the *Envision Centre Region* resident survey.

In the next week you will be receiving a mailing with the questionnaire. The survey will take about 20 minutes to complete.

Your response is an important part of shaping the community and helping local officials make decisions. Please help by participating!

Sincerely,

Jim May, Director  
Phone: 231-3050

July 18, 2011

Dear Centre Region Resident:

During the week of July 5<sup>th</sup>, you received a resident survey asking for your attitudes and opinions regarding land use, transportation, housing, the economy, and the environment in the Centre Region. If you have already completed the survey, thank you! No further action is necessary.

If you have not had a chance to complete the survey, please take some time to do so now. Please go to <http://crpa.intelligsurvey.com/> to complete the survey on-line. You will be asked to enter the following user ID and unique password. All responses will be anonymous—the purpose of the password is to ensure that we receive only one survey per person. Your user ID and password are:

User ID: **CRPA**

Password:

Or you may contact us at 231-3050 and a new survey will be mailed to you. Please complete the on-line survey or return the mail-in survey no later than **August 8, 2011** to make your opinion count.

Any questions about the survey may be directed to the Centre Regional Planning Agency at 231-3050.

Your participation in this survey is very important to us! Thank you for your time and opinions.

Sincerely,

Janet Sulzer, Chair  
Centre Regional Planning Commission

Jim May, AICP, Director  
Centre Regional Planning Agency

The Centre Daily Times is a community-oriented newspaper. We are passionate about our responsibility as Centre County's most compelling and trustworthy information source.

**Thumbs-up:** To Cindy Kolink, whose Jared Box Project idea that started in State College 10 years ago has spread to 39 states and four countries.

**Thumbs-up:** To the 2011 Summer Jazz Celebration, taking place again today on the streets of Bellefonte.

**Thumbs-down:** To the continuing stalemate in Washington as the possibility of a U.S. financial default draws closer to an Aug. 2 deadline.

THIS IS BELIEVE

When respect is given, it's received

At a very early age, I learned what respect was and why I needed to use it. I saw respect reflected in the way my parents treated my sisters and me when handling important family issues. When my father was in the Air Force, my parents always let us kids help decide where we wanted to move next. We got to help decide where to go on family vacations and which charities we wanted to support. We were just kids, but our parents respected our opinions.

Then my family moved to State College, and I learned not everyone is respectful. The downtown area is the hub of student activity. Lively conversations are one thing, but I hear loud arguing and abusive language while walking around with my friends. The parties at downtown fraternities spill into the streets. The student get loud and crazy and throw beer trash into neighbors' yards.

But college students aren't the only ones being disrespectful. I've seen year-round State College residents making our parks, streets and sidewalks dirty and unwelcoming. Those college kids have to have learned somewhere, right?

Respect is mutual. You have to give it to get it. Because I was shown respect in my own home, I make it a point to give it to others. At my high school, we had a foreign exchange student from Japan. At first, I thought some kids might pick on her because of her accent. Instead, everyone helped her find her classes, invited her to parties and even took her out to plays. She, in turn, taught us about her culture. She even gave a presentation about Japan at our school's Diversity Day. We learned from each other because we respected each other.

My sisters have taught me a lot about respect. They were both waitresses and I spent a week in the way they treated their customers. They were always aware of "regulars" who came in for dinner and would put their orders in right away.

At work, my sisters would often lend a sympathetic ear, helping customers get through personal issues. Even when people treated them badly, my sisters kept their composure. This not only showed respect for the individual they were dealing with, but self-respect as well. They didn't allow rude customers to affect their actions.

Respect is simple to give. It's as simple as not talking back to your parents or holding the door for someone with a lot of bags. Once you start doing these things, you'll notice other situations where you can show respect. You'll become more aware of the people around you and the role you can play in making the world better for everyone.

Other people notice when they are being respected and are moved to show acts of respect in turn. Respect can lead to happier relationships and new opportunities. I have strong relationships with my parents and friends because we respect each other. Respect isn't just for old people, young people, strangers or family members. It is for everyone. I believe in respect.

Collin Pasch lives in State College. His essay dated July 20, 2011.

Help shape future of Centre Region

Where does the future come from? Population forecasts indicate that the Centre Region will grow from about 96,000 people in 2010 to about 114,000 people over the next 30 years, a population increase of about 19 percent.

Some municipalities will grow faster than others, but how will the region accommodate this growth? For example, how should municipalities preserve natural features in the region? Should they use public tax resources or should the municipalities use regulations such as zoning or preservation assessments?

What is the highest priority for the next 30 years — diversifying downtown businesses, protecting existing neighborhoods or preserving farmland? What types of housing should the region focus on — single-family homes, townhomes or apartments? What is the need for affordable housing in the region?

The Centre Regional Planning Agency is exploring these and a number of other important questions during the Centre Region Comprehensive Plan Update. The Comprehensive Plan is the major policy guide to the physical development of the region over the next 20 to 30 years.

Many of you recently received a survey titled "Envision Centre Region: A Community Survey for the Centre Region Comprehensive Plan." The intent of the survey is to learn about resident attitudes and opinions regarding land use and development, transportation, housing, the environment, the economy and communication among residents and government. Residents' input on the survey will help elected officials formulate policy to use as a guide for expected future growth in the Centre Region.

We have already heard from more than 200 residents and want to hear from more. For those who have not completed your survey, this is a reminder to make your voice count. Please complete and return your survey before Aug. 8. Residents who did not receive a survey but who want to participate in the process can complete a survey at www.crogn.net. All surveys must be completed by Aug. 8. Through this survey and other public forums, the Centre Regional Planning Agency intends to build on residents' knowledge currently view the region and how they would like to see the region continue to prosper and grow in the future. The survey is one tool that will help planners and elected officials prepare a successful comprehensive plan. The results of the survey will help us to understand and address the most important issues from all segments of the Centre Region community.

Over the past year, the CRPA has been working with the Centre Regional Planning Commission as well as at the municipal level to launch the comprehensive plan update. The CRPA will conduct additional public forums in the late summer and fall.

If you want to learn more about the comprehensive plan update, please call the CRPA at 231-3030, email planning@crogn.net, visit www.crogn.net or find us on Facebook at Centre Regional Planning Agency.

As Yogi Berra once said, "If you don't know where you're going, you might wind up somewhere else."

It is time for residents in the region to help update the Regional Comprehensive Plan, envision the future and chart the course that will help take us to the future we desire.

Jim May is planning director for the Centre Regional Planning Agency.

Funding needed to save our most vulnerable

Every day in Washington, in the halls of Congress as the members of Congress, the talk is of the fiscal crisis our country is facing. It is a legitimate concern, and many federal programs are facing increased scrutiny as budget cuts need to be made.

As leaders in Washington seek ways to pay the government's bills, some are making suggestions that could have short-term financial gains at the expense of long-term health and safety. One such plan can be seen in President Barack Obama's proposed elimination of the Children's Hospitals and Clinics Medical Education program in his 2012 budget.

If this elimination were to take place, our children's health would be put at risk. The program funds the medical training of pediatricians and pediatric specialists who care for children. Imagine your child is born with a congenital heart defect and needs surgery during her first week of life. The cardiovascular surgeon, cardiologist, anesthesiologist and intensive-care physicians who treat your child all require specialized pediatric training because operating on a heart the size of a walnut is dramatically different from doing bypass surgery on an adult. If the funding for this specific training disappears, our children's health is at risk.

In 1980, the program was enacted with the strong bipartisan support of Republican and Democrat

champions in Congress who agreed that independent children's teaching hospitals should receive some level of federal support for pediatric training.

Adult teaching hospitals at the time received more than 200 times the federal support per resident than independent children's teaching hospitals received, and children's hospitals' residency programs were on the decline.

In the past decade, while the program's funding has increased by a modest 1.6 percent annually, the number of residency programs has grown by 32 percent. This growth has helped address a national shortage of pediatric specialists. Today, 56 independent children's teaching hospitals in the CHCME program train 40 percent of all pediatric specialists.

In many communities across the country, the commitment to training has helped build the supply of pediatricians who successfully are managing more complicated conditions in children. Yet children still face problems accessing pediatric care. In 2010, a National Association of Children's Hospitals and Related Institutions study found severe shortages in high-demand pediatric specialties such as behavioral developmental pediatrics and pediatric pulmonology.

Shortages result in appointment wait times that average more than three months for some specialties — too long for any sick child.

While there are many factors that contribute to shortages, CHCME is helping to address these deficiencies and improve health outcomes for children at the national level and in local communities.

For example, along with investments in biomedical research, pediatric specialists, more than half of whom are trained in children's hospitals that receive CHCME, have helped reduce mortality rates significantly in children with cancer.

The program is also helping to address the challenging problems of access, cost and quality at the local level. For example, Nationwide Children's Hospital, which receives annual CHCME funding, has doubled the pediatricians and specialists it is able to train, which has expanded access and enabled it to become a national leader in the care of about 300,000 Ohio children on Medicaid from urban Columbus to rural Appalachia.

For these children, the hospital, in partnership with more than 750 physicians, accepts payments to coordinate and improve care from primary care medical homes to the most complex hospital treatment.

Congressional leaders have introduced bills to reauthorize the program for an additional five years. Although reauthorization looks promising at this juncture, annual funding of the program hangs in the balance as lawmakers negotiate budget deals that must address long-term deficit reduction.

There are difficult fiscal choices to be made right now, but CHCME is a program that works. It is accomplishing what it was designed to accomplish and not duplicating the work of existing programs. And there is no other source of state funding for pediatric training for independent children's teaching hospitals.

If CHCME declines, so will the pediatric workforce that cares for children. There are some commitments to children our nation needs to keep, and this is unquestionably one of them.

James Mandell is chairman of the board of trustees of the National Association of Children's Hospitals and Clinics (www.childrenshospitals.org) and CEO of Children's Hospital of Eastern Ohio. He is also president of the American Academy of Pediatrics. Readers may write to them at P.O. Box 402, Willsie St., Alexandria, VA 22314.

YOUR LETTERS

Coverage was inadequate

I was greatly disappointed that more attention, recognition and newspaper space was not given to a valued State College resident.

Pat Boland was known by almost everyone here and in the sports world. His photo and article should have been in the Centre Daily Times that morning as the major headline. One wonders about priorities sometimes.

I listened to Jan and Karin Nelson on WRSC 1390 AM. The two made a great team as they complimented one another beautifully.

The man whose life was cut so short by the Death Angel will be greatly missed. Already I feel I have lost a good friend. I say that realizing that I only saw him a couple of times. But what a voice he leaves in my life after waking up to his unique and interesting conversation every morning.

I concur with Nelson, who suggested that "God must have needed him more here than we did down here." Understandably, I don't think his parents and family realized how much we respected and relied on in State College.

Frank Horer  
State College

Restaurants did the right thing

I applaud the decision of Danie's Restaurants to suspend the sale of alcoholic beverages on State Park's Day. Next year, if other businesses followed Danie's lead, perhaps this event that encourages excessive alcohol consumption would fade out of existence.

Most areas residents would much prefer that State College is known as a great place to live, not a town with a drinking problem.

Dear Centre Region Resident:

You were recently chosen to participate in a community survey asking for your attitudes and opinions regarding land use, transportation, housing, the economy, and the environment in the Centre Region. **If you have already completed the survey, thank you for your time and opinions!** No further action is necessary.

If you have not had a chance to complete the survey, please take some time to do so now. Your participation is very important to us as we strive to achieve a statistically valid response rate!

The survey may be completed on-line at <http://crpa.intelligisurvey.com/>. You will be asked to enter the user ID and unique password located in the upper right hand corner of this letter. The purpose of the password is to ensure that we receive only one survey per person—**all responses will be anonymous**. Or, if you would prefer to have another copy of the paper survey mailed to you, please contact our office at 231-3050.

In an effort to make sure your opinions count, the deadline for returning the survey has been extended to **August 19, 2011**.

Any questions may be directed to the Centre Regional Planning Agency at 231-3050.

Sincerely,

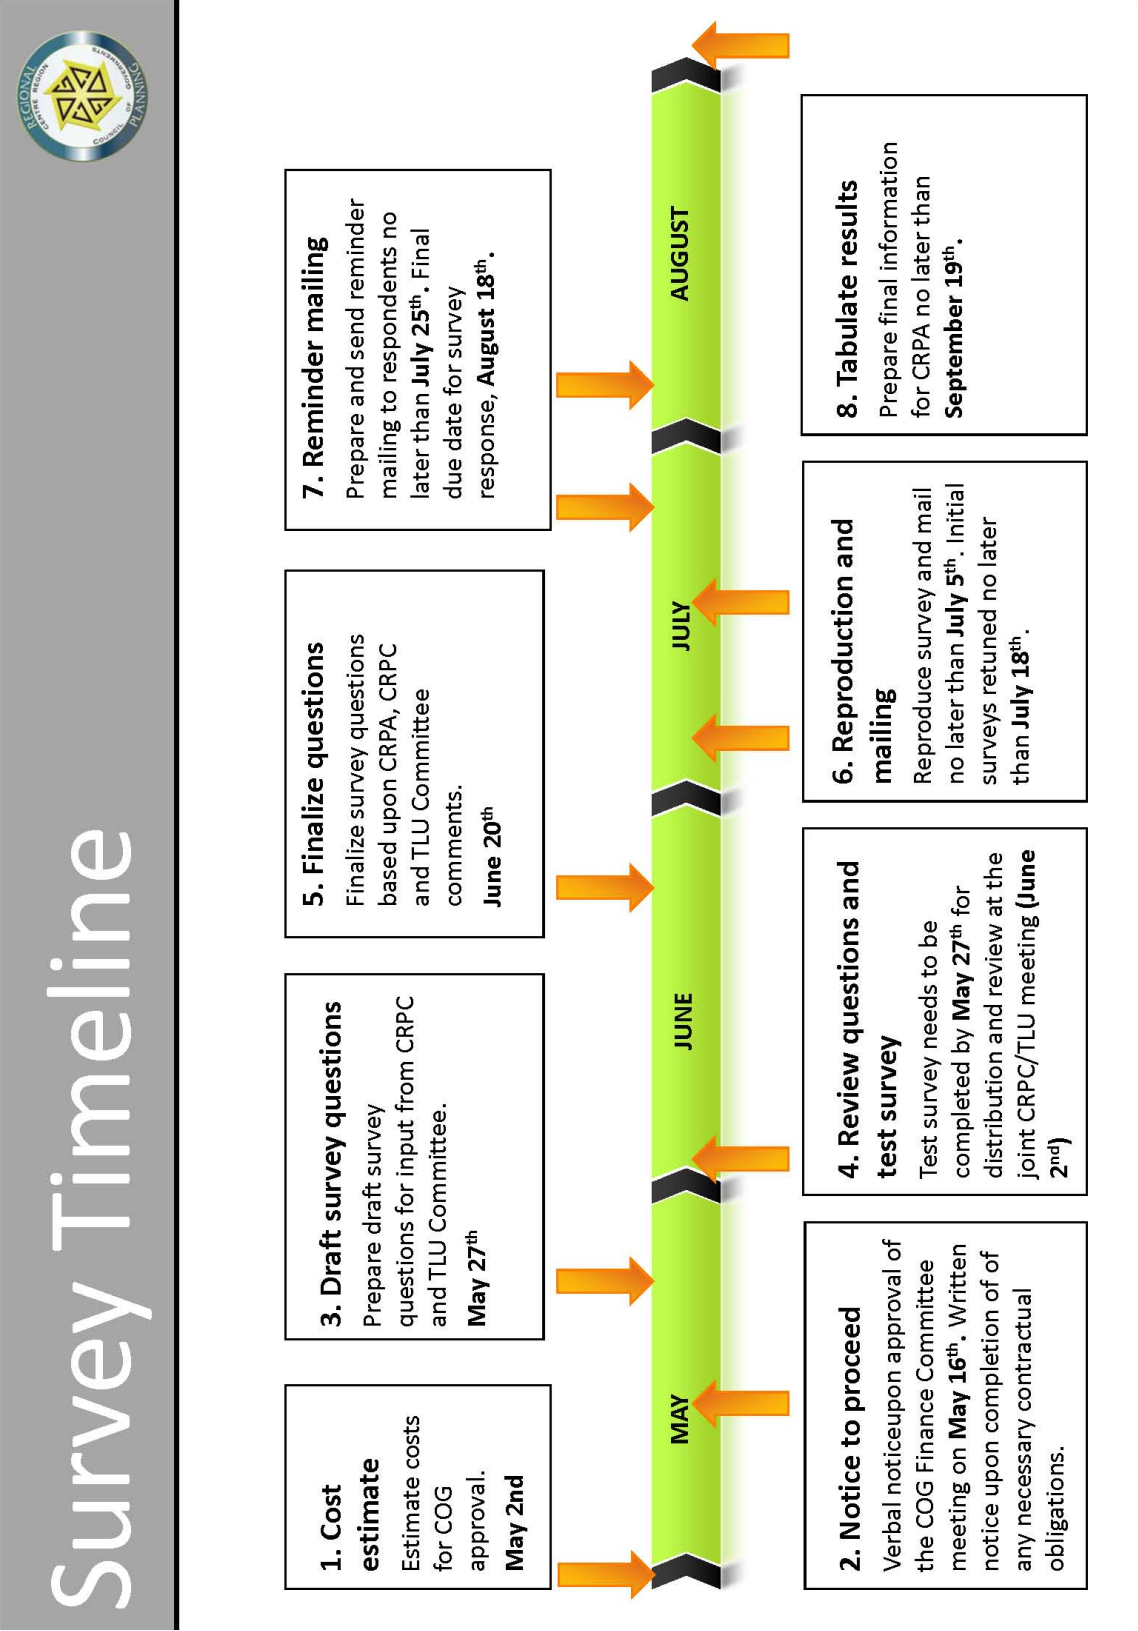

Janet Sulzer, Chair  
Centre Regional Planning Commission
