- ▭ County Boundary
- ▭ Municipal Boundary

Similar to many other urbanized areas throughout the United States, the Centre Region experienced a steady increase in the number of residential building permits, as evidenced in the graph below, between 2004 and 2006. As seen throughout the country, the number of new residential building permits declined sharply in 2007 and continued this pattern in subsequent years. Of the 2,963 building permits for new construction issued between 2004 and 2016, 90% were issued for properties located within the Regional Growth Boundary.
